Assembly sets

moveIT

Configuration of the HELLA products

- Powerful product configurator for sun protection products
- All HELLA products are available in the system
- Safe and guided product data recording for offers and orders
- List prices and conditions of purchase are stored for our customers, that the customer can see the correct customer-specific purchase price as well as the margin at any time
- A professional offer is immediately available at the push of a button and can be forwarded to the customer

Advantages

- Easiest employee training due to the possible and allowed selection of a product.
- Saves time and costs
- Reducing extensive training for the products due to options and standard recordings.
- Graphic support in the course of the configuration
- Printed price lists are no longer required.
- Products and prices are always up-to-date
- Ongoing checking of the products for feasibility due to comprehensive, integrated checks; in this way products that are technically not feasible are excluded
- Orders are immediately digitally forwarded to HELLA, the completion of forms is no longer necessary and thus no transmission errors can occur and manual input is not required.
- Tailor-made interfaces to industrial systems
- Data exchange via XML OpenTrans possible

Available systems

moveIT@ISS+

- Advanced possibilities for dealers of sun protection products with own customer management
- Management of own articles
- Digital order direct at HELLA
- Products are offline available at the customer

moveIT@EASY

- WEB solution for small dealers of sun protection products
- Easiest offer preparation and digital order directly at HELLA
- No software installation

moveIT@WEB as interface to SBH realised

- Integrated directly in the industry-sector-specific software from SBH
- Offer preparation and order management directly from within SBH
- Digital order direct at HELLA

Type overview

Insect screen for window

Clamping frame ISR

The origin of the insect screen is an insect screen fabric that is clamped to a frame – the so-called clamping frame. A clamping frame is universally adjusted to the corresponding window type and can usually be unhinged by hand without great effort and without tools. Depending on the insect screen fabric used, a clamping frame can also protect against small rodents or pollen.

Suspension bracket spring-mounted

- Window undrilled
- Space required 15 mm in front of the window
- All window types

Suspension bracket outside

- Window undrilled
- Space required 15 mm inside the window frame
- Recessed and half recessed windows

Spring pins

- Window drilled
- Space required 18 mm inside the window frame
- Recessed and half recessed windows

Installation with screws

- Window drilled
- Space required 12 mm in front of the window
- All window types

Insect roller screen IS13

If the insect screen is opened often, for example to water the plants on the outer window sill, an insect roller screen is the perfect solution due to its quick and convenient operation possibility. During the winter months the roller blind is retracted into the cassette and therefore perfectly protected against snow and ice.

- Space required 43 mm in front of the window
- All window types
- Cassette shape quarter round X or quadratic Q

Besides the stand-alone roller blind variant IS13, the insect roller screen is as integrated version available in different sun protection products. The corresponding details are shown in the documents of the respective sun protection products.

Type overview

Insect screen for doors

Swing frame ISD

The insect screen frame is provided with hinges so that it can be opened in the same way like the door that belongs to it.

Swing framed are amongst other things available with the following features:

- Tread plate to be operated per foot, if you have no free hand
- Tread plate with cat flap, so that the pet can easily pass through the insect screen
- Spring lock for a self-closing door

ISD E - swing frame single

- Space required 15 mm in front of the door
- Brush sealings towards all sides freely selectable
- Door elements without protruding handles and fittings

ISD Z - swing frame with frame

- Space required 18 mm in front of the door or inside the door frame
- All door elements
- Also available in a double-winged design

Slide frame IST

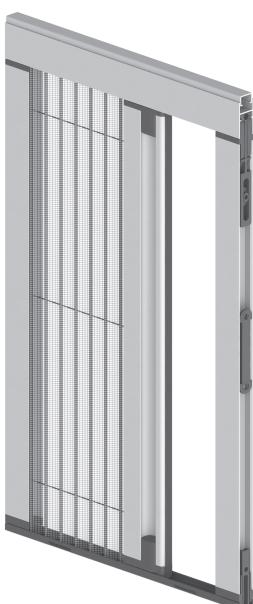

For the slide frame, the same space should be left on the side of the door or window wing that is to be sealed to allow for opening it completely. Because of this, slide frames are only suitable for door and window elements with two or more wings. In that case the frame usually seals the active leaf and is pushed in front of the non-active leaf when it is opened. Due to the very high stability of the slide frame profile, frames up to a frame surface of 4.4 m² can be designed without sash-bars.

IST E - slide frame simple

- Space required 17 mm in front of the door
- Door elements without protruding weatherboard
- Also available in a double-winged design

IST Z - slide frame with frame

- Space required 30 mm in front of the door
- All door elements

Pleated insect screen ISPL18

The pleated insect screen is perfectly suitable for use in confined spaces, because, compared to the swing frame, it does not require a swivelling range. During the winter months the pleated insect screen remains laterally stacked and it is not necessary to unhinge it.

- Space required 18 mm with lateral installation
- Space required 23 mm with installation from the front with optional installation frame
- Window undrilled, if installation frame glued is selected

Type overview

Light shaft cover

Light shaft cover ILS

- Suitable for different recess types
- Frame profile 6 mm high only

General notes

⌚ Dimensioning Instructions

The definitions described in these dimensioning instructions are to be understood as a proposal only, how the dimensioning of the different insect screen systems may be carried out. The working steps are not mandatory!

The illustrations shown are only examples.

⌚ Assembly instructions

The working steps described in these assembly instructions are to be understood as a proposal only, and exemplarily show the possibilities to assemble the different insect screen systems. The working steps are not mandatory!

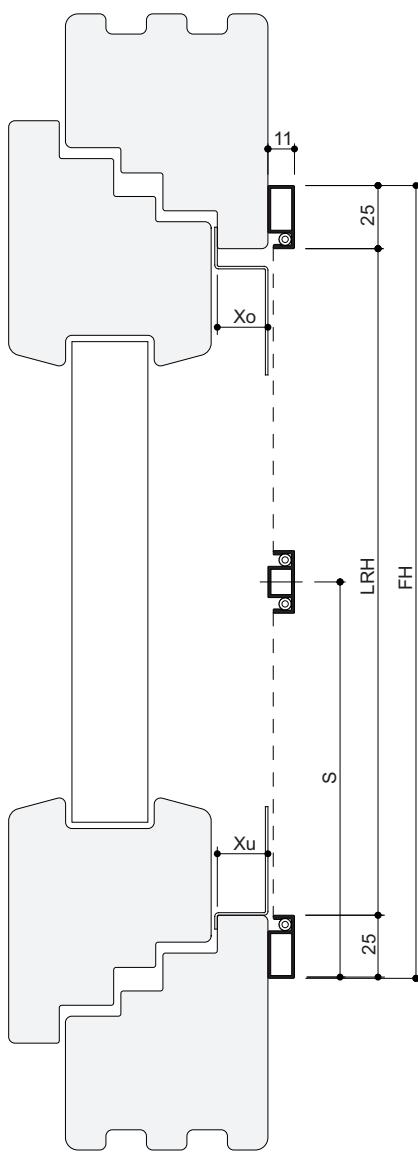

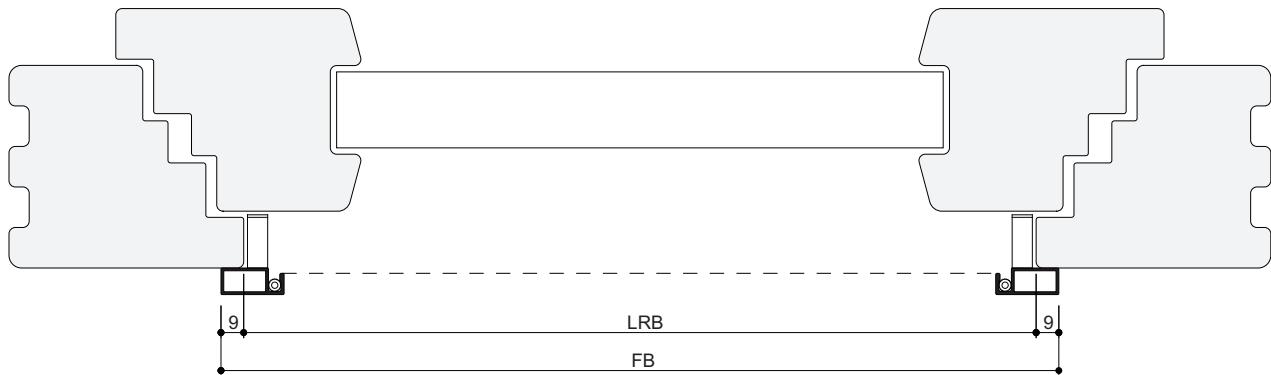

The illustrations shown are only examples. These instructions apply for other types of insect screen systems too!

⌚ Legal notes

The graphs and texts of these instructions were carefully prepared. We cannot be held liable for any errors and their potential consequences! Subject to technical modifications to the product and to these instructions! These instructions include copyrighted information. All rights reserved! The listed product or brand names are trademarks of the respective owners.

Determining the dimensions of the clamping frame

Type: ISR 1A - Suspension bracket

Notes

- Functions with recessed windows
- Space required 11 mm in front of the window
- 7 mm space required above the frame for unhinging

Legend

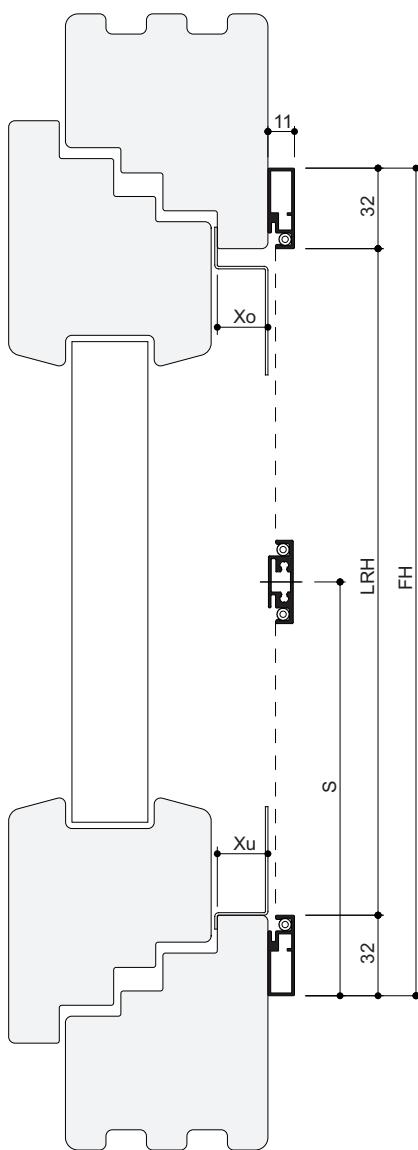

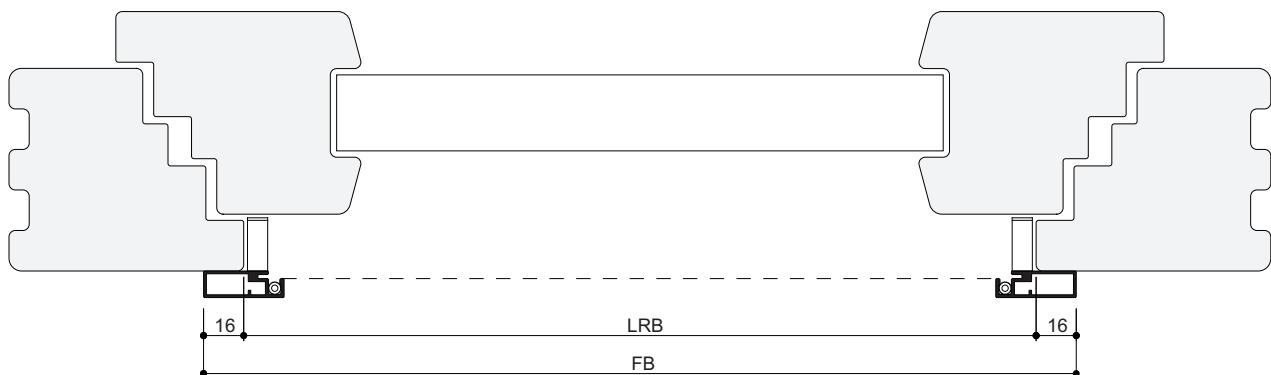

FB	Complete width ($FB = LRB + 18$)
FH	Complete height ($FH = LRH + 50$)
LRB	Clear frame width of the window
LRH	Clear frame height of the window
S	Position of the sash-bar centre from lower edge of the frame
X _o	Thickness of the blind frame at the top
X _u	Thickness of the blind frame at the bottom

Profiles provided

- 06080106 Frame profile 25x11 mm
- 06080108 Sash-bar profile pluggable

Determining the dimensions of the clamping frame

Type: ISR 1B - Suspension bracket

Notes

- Functions with recessed windows
- Space required 11 mm in front of the window
- 7 mm space required above the frame for unhinging

Legend

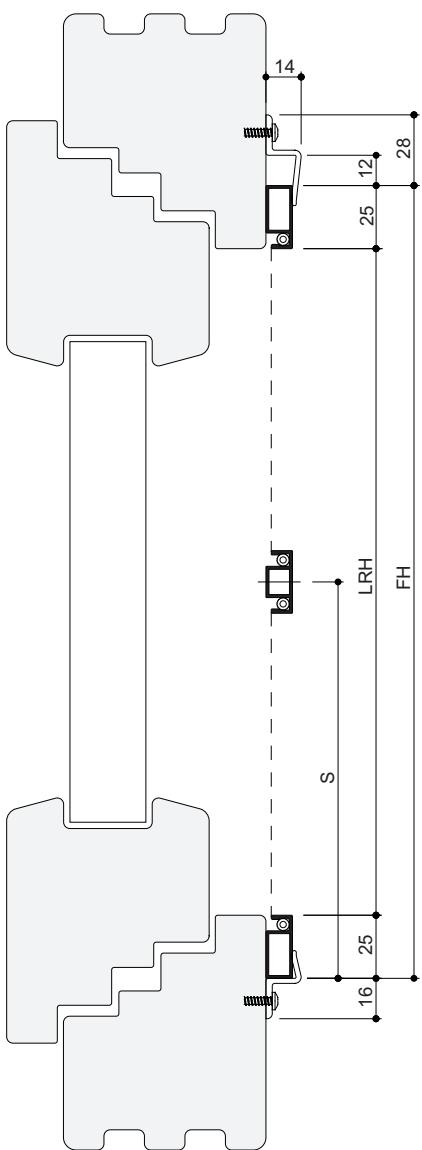

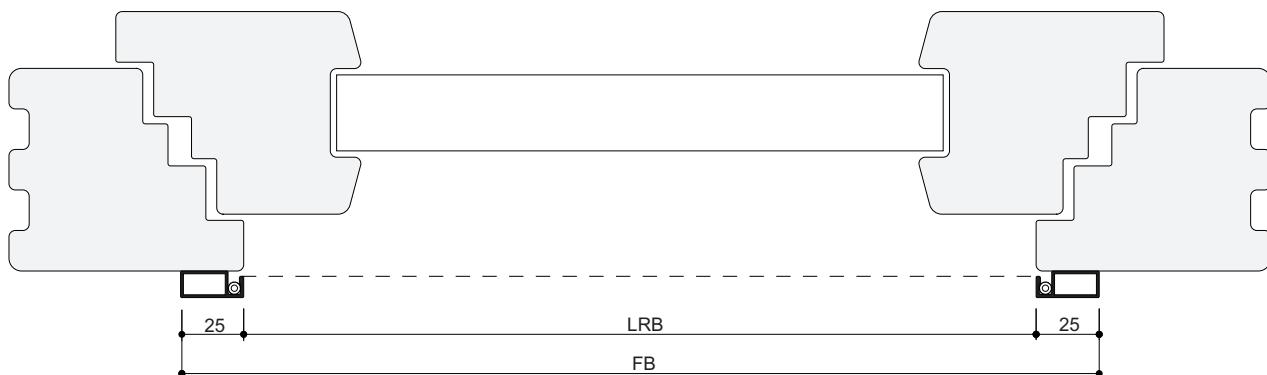

FB	Complete width (FB = LRB + 32)
FH	Complete height (FH = LRH + 64)
LRB	Clear frame width of the window
LRH	Clear frame height of the window
S	Position of the sash-bar centre from lower edge of the frame
X _o	Thickness of the blind frame at the top
X _u	Thickness of the blind frame at the bottom

Profiles provided

- 06080107 Frame profile 32x11 mm
- 06080124 Sash-bar profile 33x10mm

Determining the dimensions of the clamping frame

Type: ISR 2 - Suspension bracket on the side of the window

Notes

- Works with all types of windows
- Space required 14 mm in front of the window
- Suspension bracket screwed to the window frame

Legend

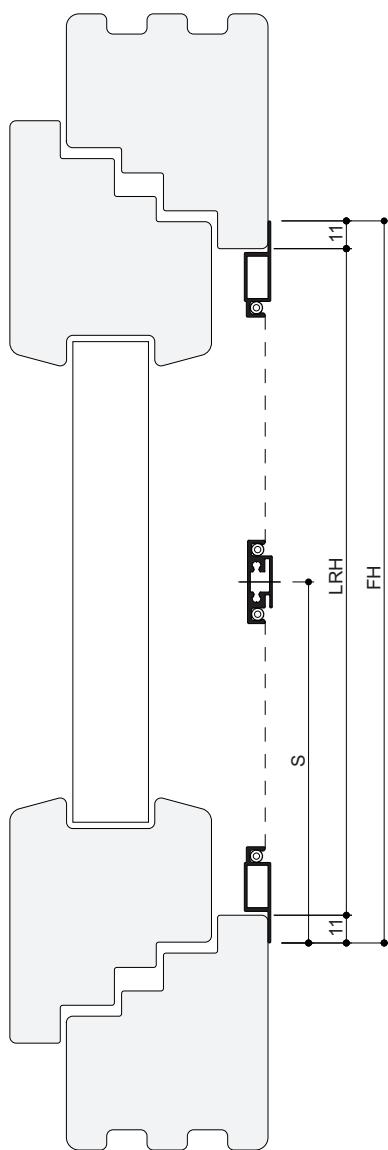

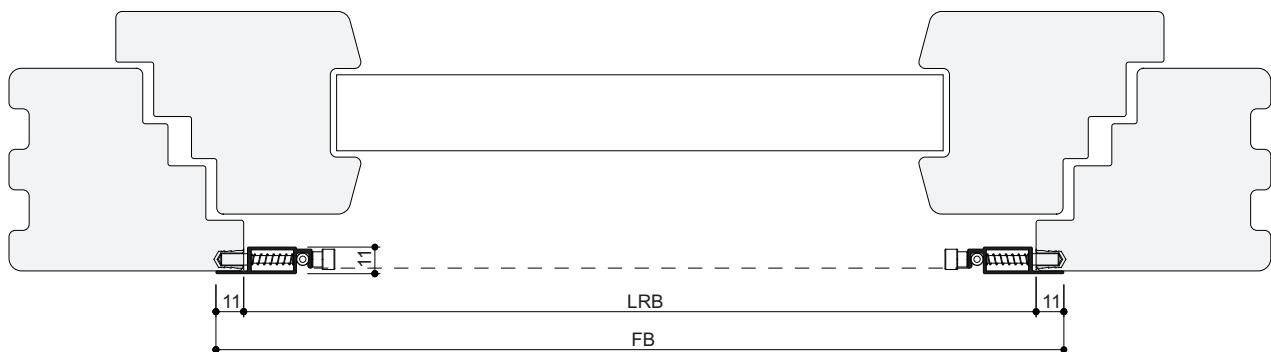

- | | |
|-----|--|
| FB | Complete width ($FB = LRB + 50$) |
| FH | Complete height ($FH = LRH + 50$) |
| LRB | Clear frame width of the window |
| LRH | Clear frame height of the window |
| S | Position of the sash-bar centre from lower edge of the frame |

Profiles provided

- 06080106 Frame profile 25x11 mm
- 06080108 Sash-bar profile pluggable

Determining the dimensions of the clamping frame

Type: ISR 3A - Spring pins

Notes

- Functions with recessed and half recessed windows with straight rabbet and without weatherboard
- Space required 11 mm inside the window
- Window rabbet drilled and provided with press-fitting bushing

Legend

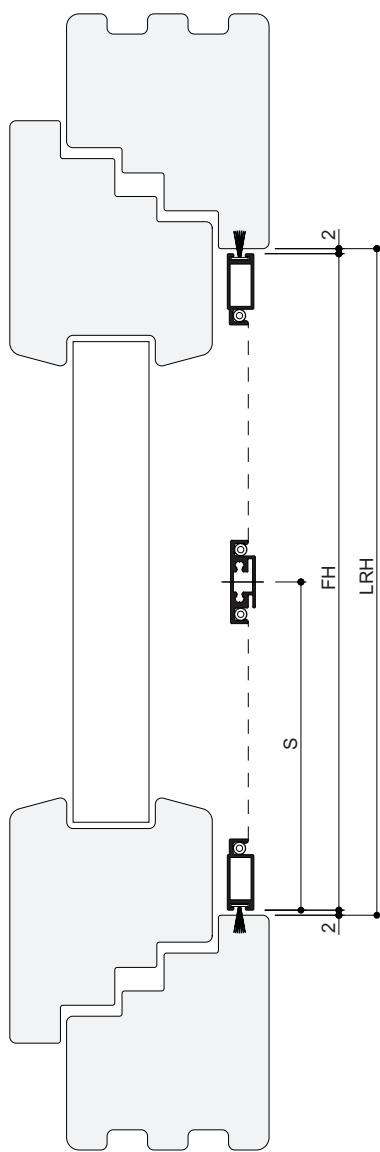

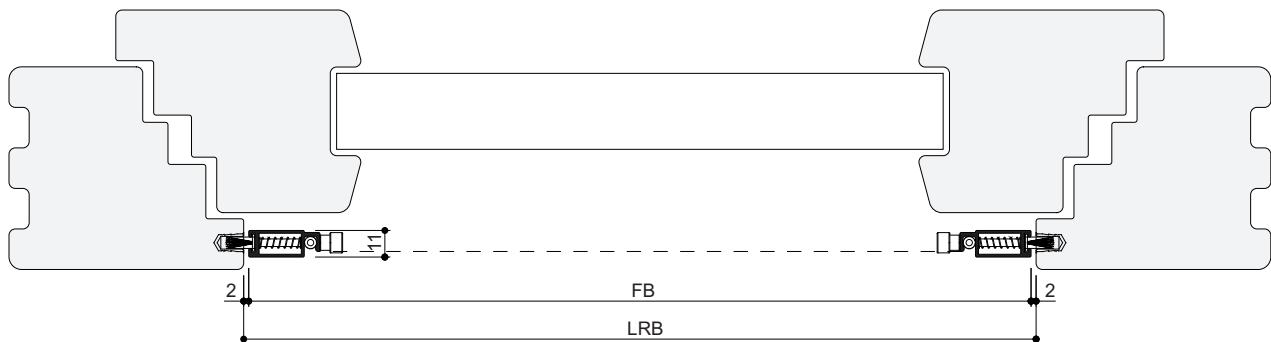

FB	Complete width ($FB = LRB + 22$)
FH	Complete height ($FH = LRH + 22$)
LRB	Clear frame width of the window
LRH	Clear frame height of the window
S	Position of the sash-bar centre from lower edge of the frame

Profiles provided

- 06080120 Frame profile 38x11 mm with leg
- 06080124 Sash-bar profile 33x10mm

Determining the dimensions of the clamping frame

Type: ISR 3B - Spring pins

Notes

- Functions with recessed and half recessed windows with straight rabbet
- Space required 11 mm inside the window
- Window rabbet drilled and provided with press-fitting bushing

Legend

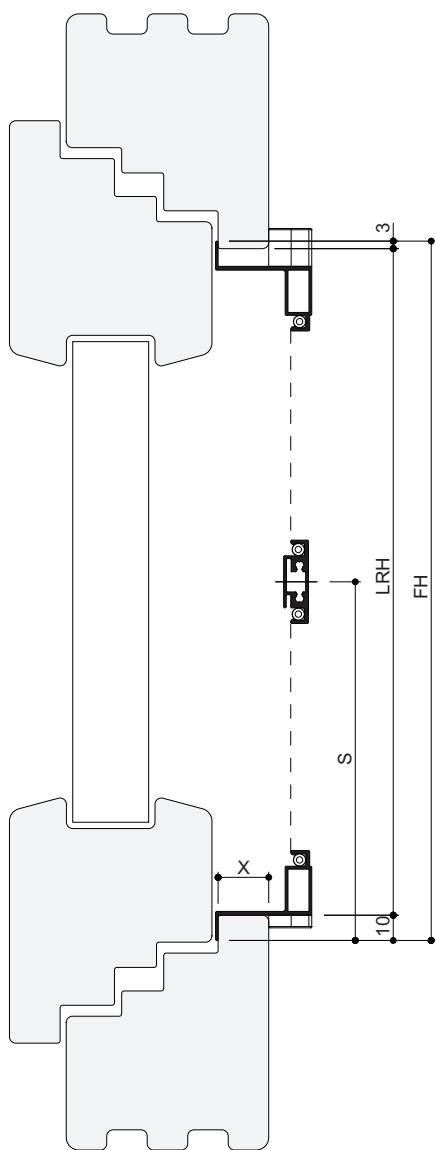

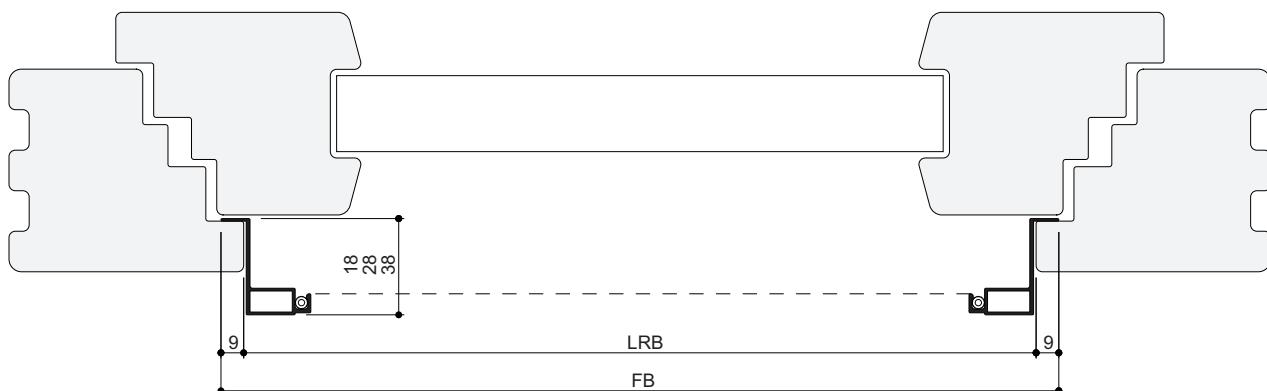

FB	Complete width ($FB = LRB - 4$)
FH	Complete height ($FH = LRH - 4$)
LRB	Clear frame width of the window
LRH	Clear frame height of the window
S	Position of the sash-bar centre from lower edge of the frame

Profiles provided

- 06080119 Frame profile 28x11 mm with groove on the face side
- 06080124 Sash-bar profile 33x10mm

Determining the dimensions of the clamping frame

Type: ISR 4 - Suspension lugs

Notes

- Functions with recessed windows
- Space required max. 15 mm in front of the window
- 6 mm space required above the frame for unhinging
- Three different profile designs - depending on the thickness of the window frame

Legend

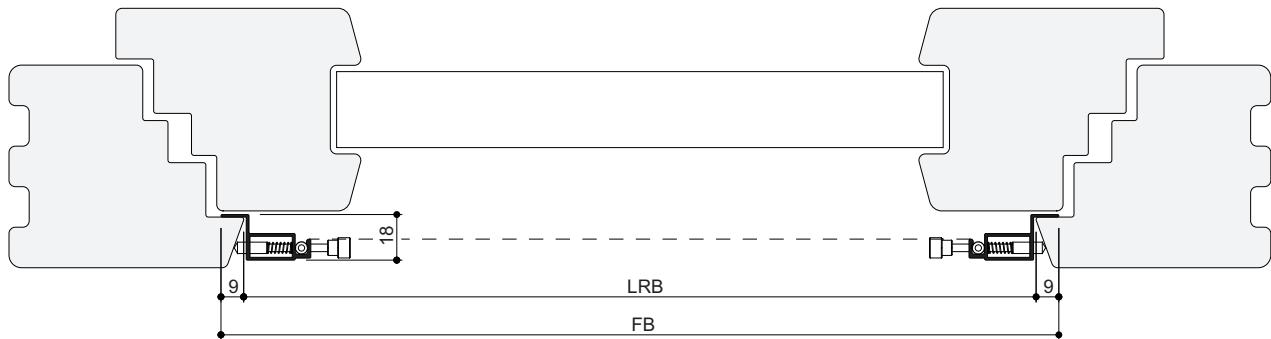

FB	Complete width ($FB = LRB + 18$)
FH	Complete height ($FH = LRH + 13$)
LRB	Clear frame width of the window
LRH	Clear frame height of the window
S	Position of the sash-bar centre from lower edge of the frame
X	Thickness of the window frame

Profiles provided

- 06080121 Frame profile 36x18 mm with leg with $X = 3-5$
- 06080122 Frame profile 36x28 mm with leg with $X = 6-15$
- 06080123 Frame profile 36x38 mm with leg with $X = 16-25$
- 06080124 Sash-bar profile 33x10mm

Determining the dimensions of the clamping frame

Type: ISR 5 - Suspension lugs with spring pin

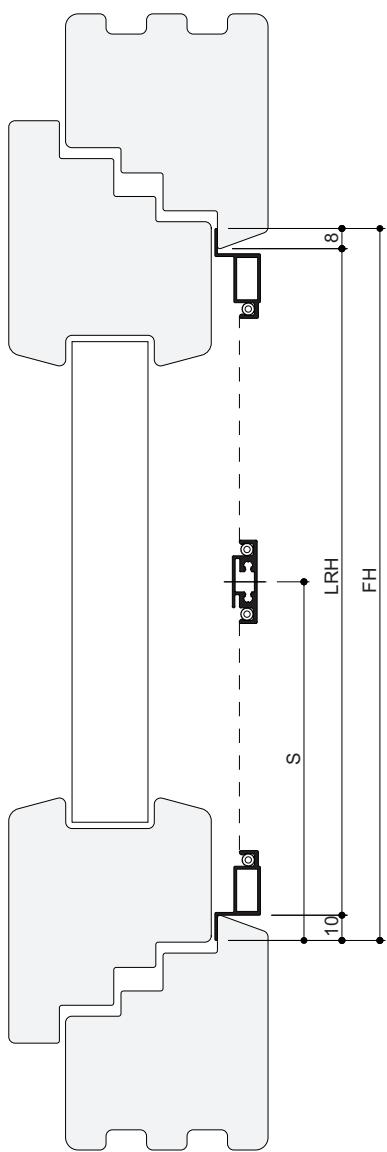

Notes

- Functions with recessed and half recessed windows with slanted rabbet
- Space required 18 mm inside the window
- Frame must be accessible from the outside

Legend

- | | |
|-----|--|
| FB | Complete width ($FB = LRB + 18$) |
| FH | Complete height ($FH = LRH + 18$) |
| LRB | Clear frame width of the window |
| LRH | Clear frame height of the window |
| S | Position of the sash-bar centre from lower edge of the frame |

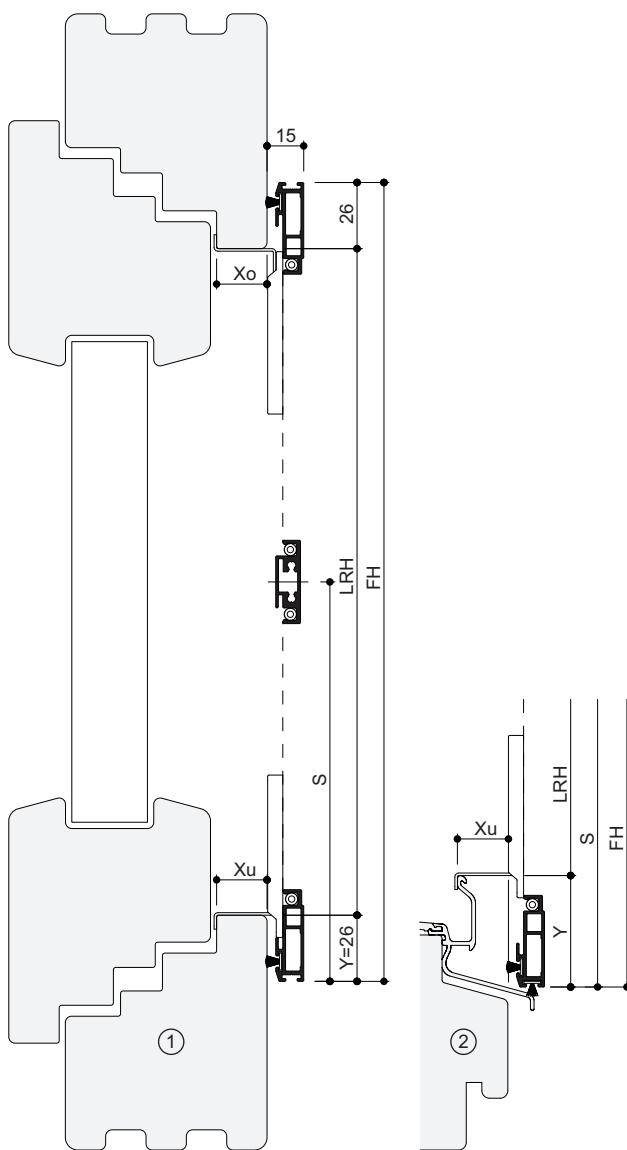

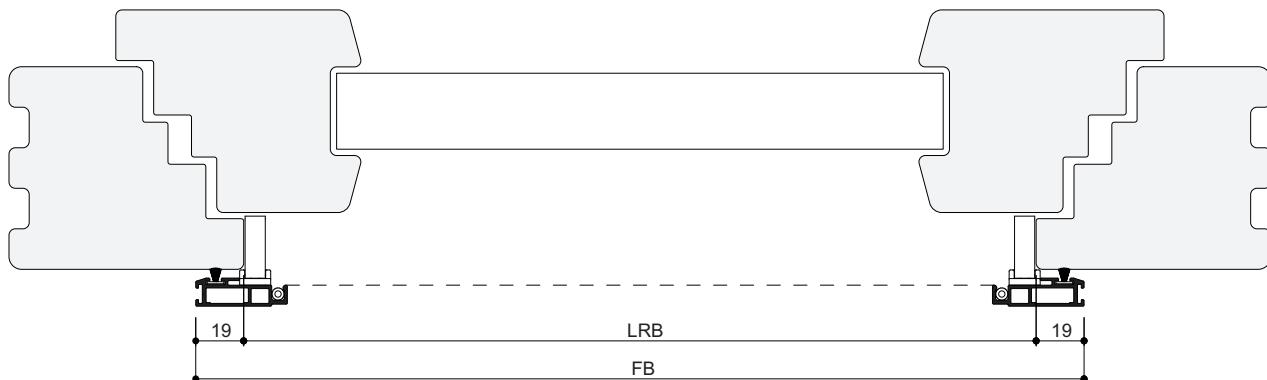

Profiles provided

- 06080121 Frame profile 36x18 mm with leg
- 06080124 Sash-bar profile 33x10mm

Determining the dimensions of the clamping frame

Type: ISR 6A - Suspension bracket spring-mounted

Notes

- Works with all types of windows
- Space required 15 mm in front of the window
- 10 mm space required above the frame for unhinging
- Sealing brushes inserted at the front side enlarge the final dimensions on the outside and must therefore be taken into account when specifying the dimensions:
 - 10 mm gap with 15 mm sealing brush
 - 20 mm gap with 25 mm sealing brush
- Via the final dimensions in your order, the lateral support surface of 19 mm can be reduced down to 12 mm, if required. If a brush on the face side is used for lateral sealing, the lateral support surface at the window can be reduced down to 0 m.

Legend

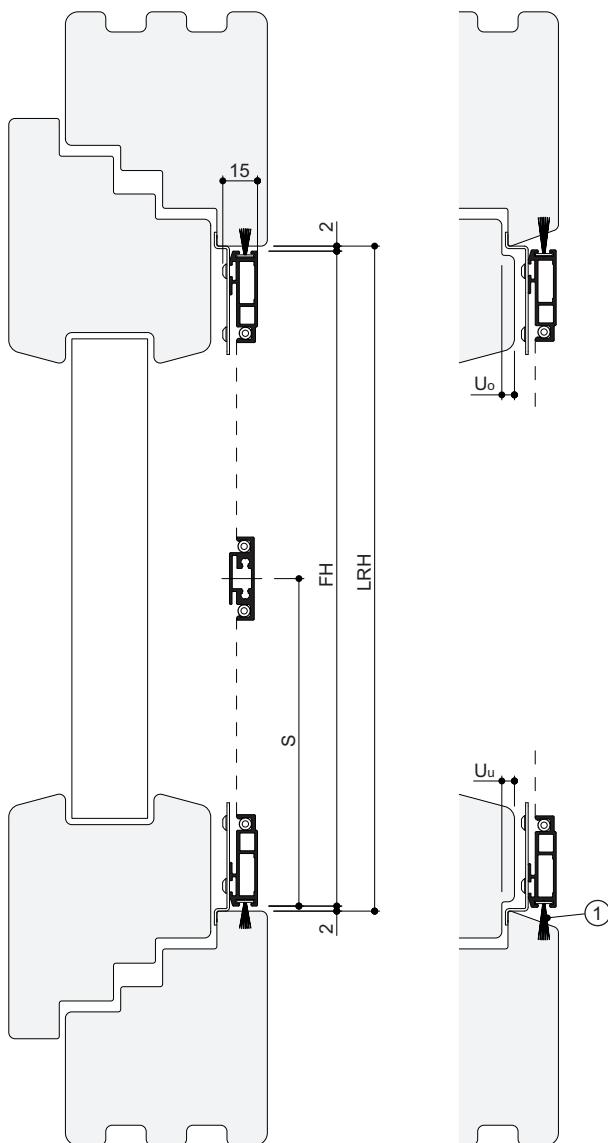

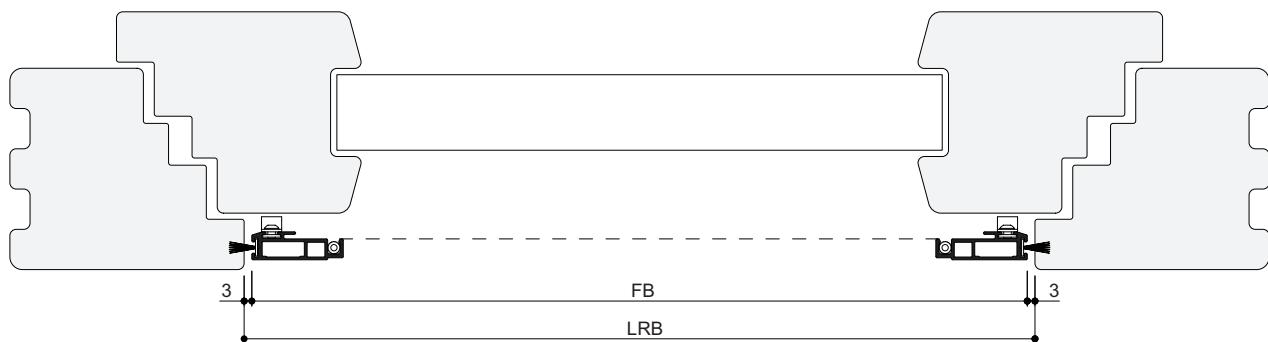

- | | |
|-----|---|
| ① | Window without weatherboard |
| ② | Window with weatherboard and special brush
6 mm at the bottom on the face side |
| FB | Complete width ($FB = LRB + 38$) |
| FH | Complete height ($FH = LRH + Y + 26$) |
| LRH | Clear frame width of the window |
| S | Sash bar position |
| Xo | Thickness of the window frame rabbet at the top |
| Xu | Thickness of the window frame rabbet at the bottom |
| Y | Position of the suspension bracket at the bottom
(standard 26 mm) |

Profiles provided

- 06080117 Frame profile 36x11 mm
- 06080124 Sash-bar profile 33x10 mm

Determining the dimensions of the clamping frame

Type: ISR 6B - Suspension bracket outside

Notes

- Works with recessed and half recessed windows
- Space required 15 mm inside the window frame
- Window frame undrilled

Legend

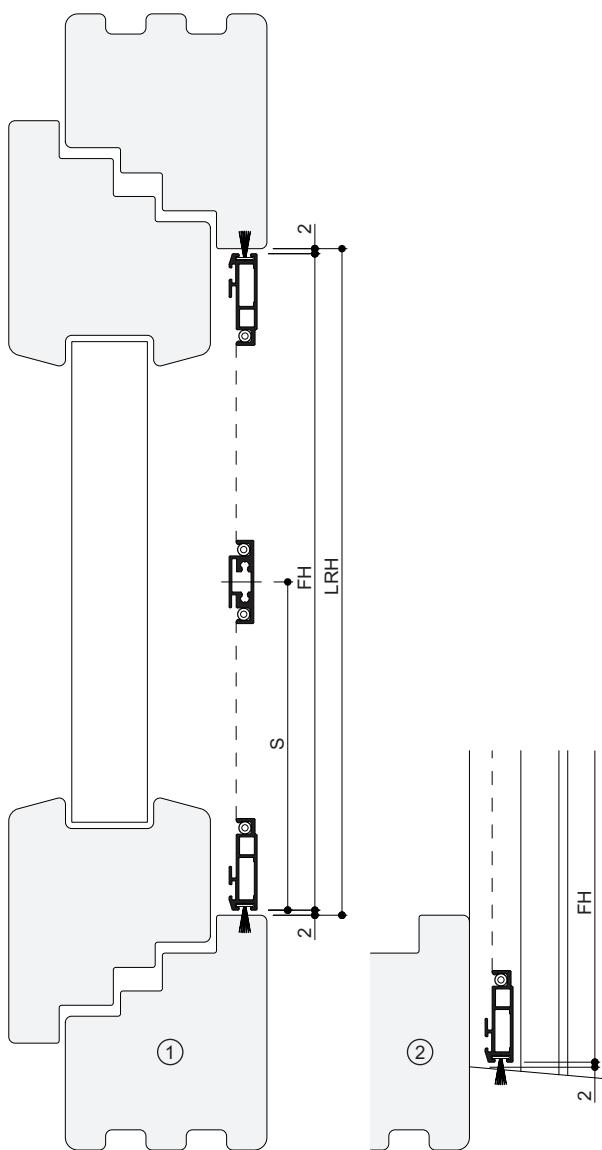

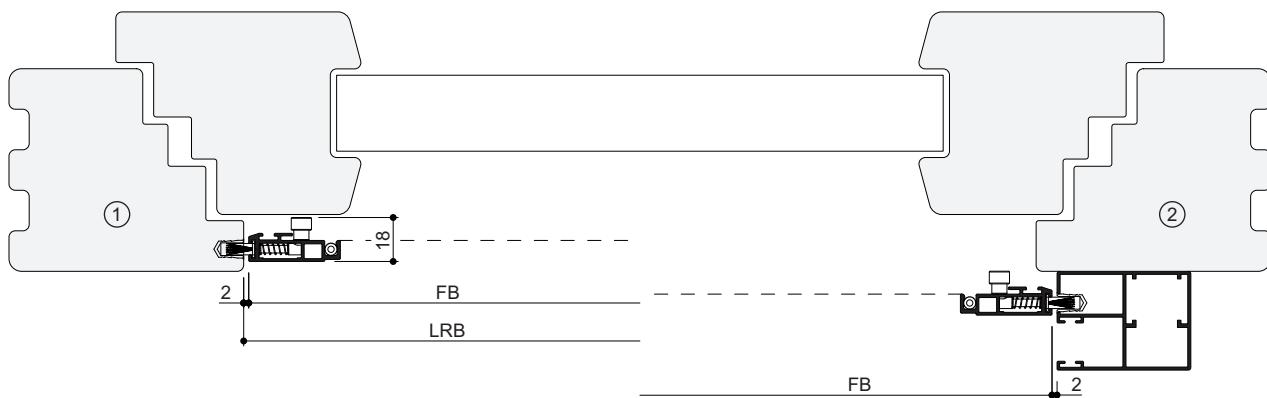

①	Special brush (15 or 25 mm) all around for windows with a large window frame slant as well as with a large protruding window wing

- 06080124 Sash-bar profile 33x10 mm

Detail spring pin

Determining the dimensions of the clamping frame

Type: ISR 6D - Installation with screws

Notes

- Works with all types of windows
- Space required 15 mm in front of the window
- Frame must be accessible from the outside
- Distance from the edge Boreholes 150 mm
- As a standard without sealing brushes
- Sealing brushes inserted at the front side enlarge the final dimensions on the outside and must therefore be taken into account when specifying the dimensions:
 - 10 mm gap with 15 mm sealing brush
 - 20 mm gap with 25 mm sealing brush

Legend

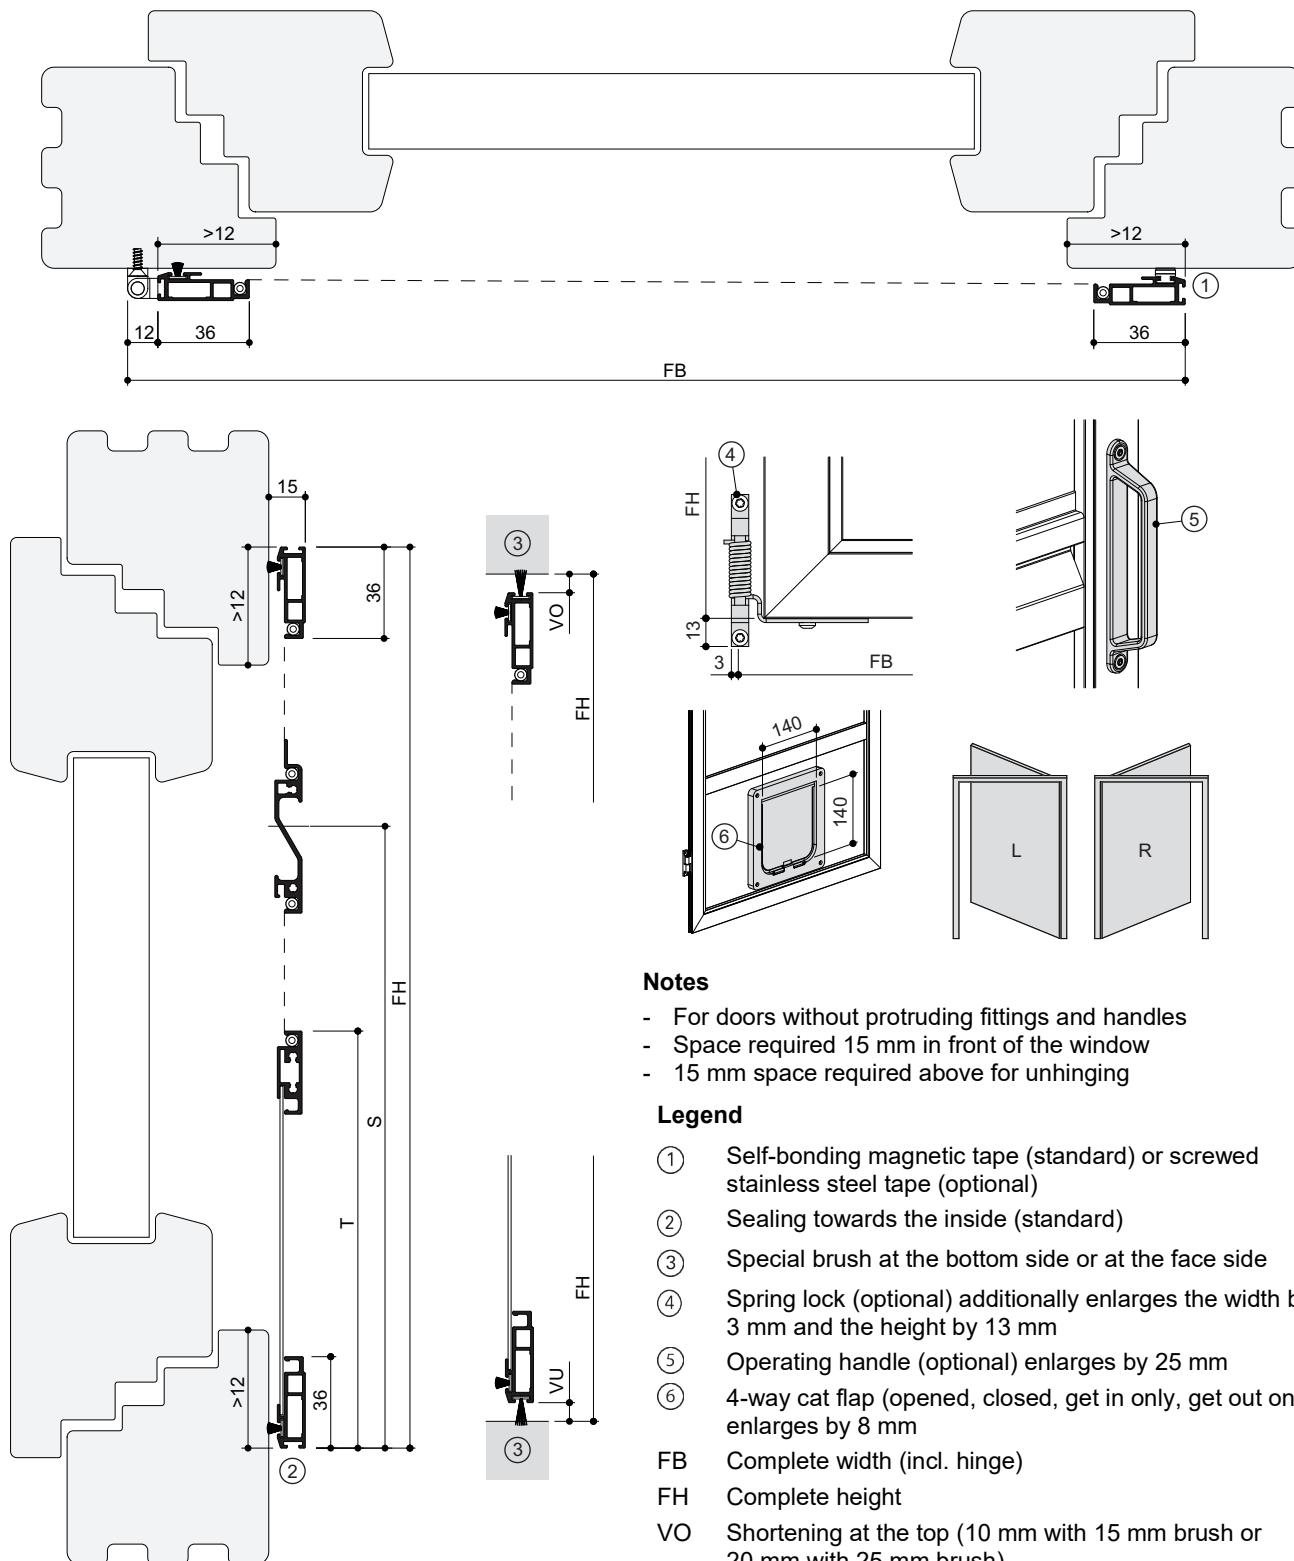

- | | |
|-----|---|

- 06080124 Sash-bar profile 33x10 mm

Determining the dimensions of the swing frame

Type: ISD E - swing frame single

Notes

- For doors without protruding fittings and handles
- Space required 15 mm in front of the window
- 15 mm space required above for unhinging

Legend

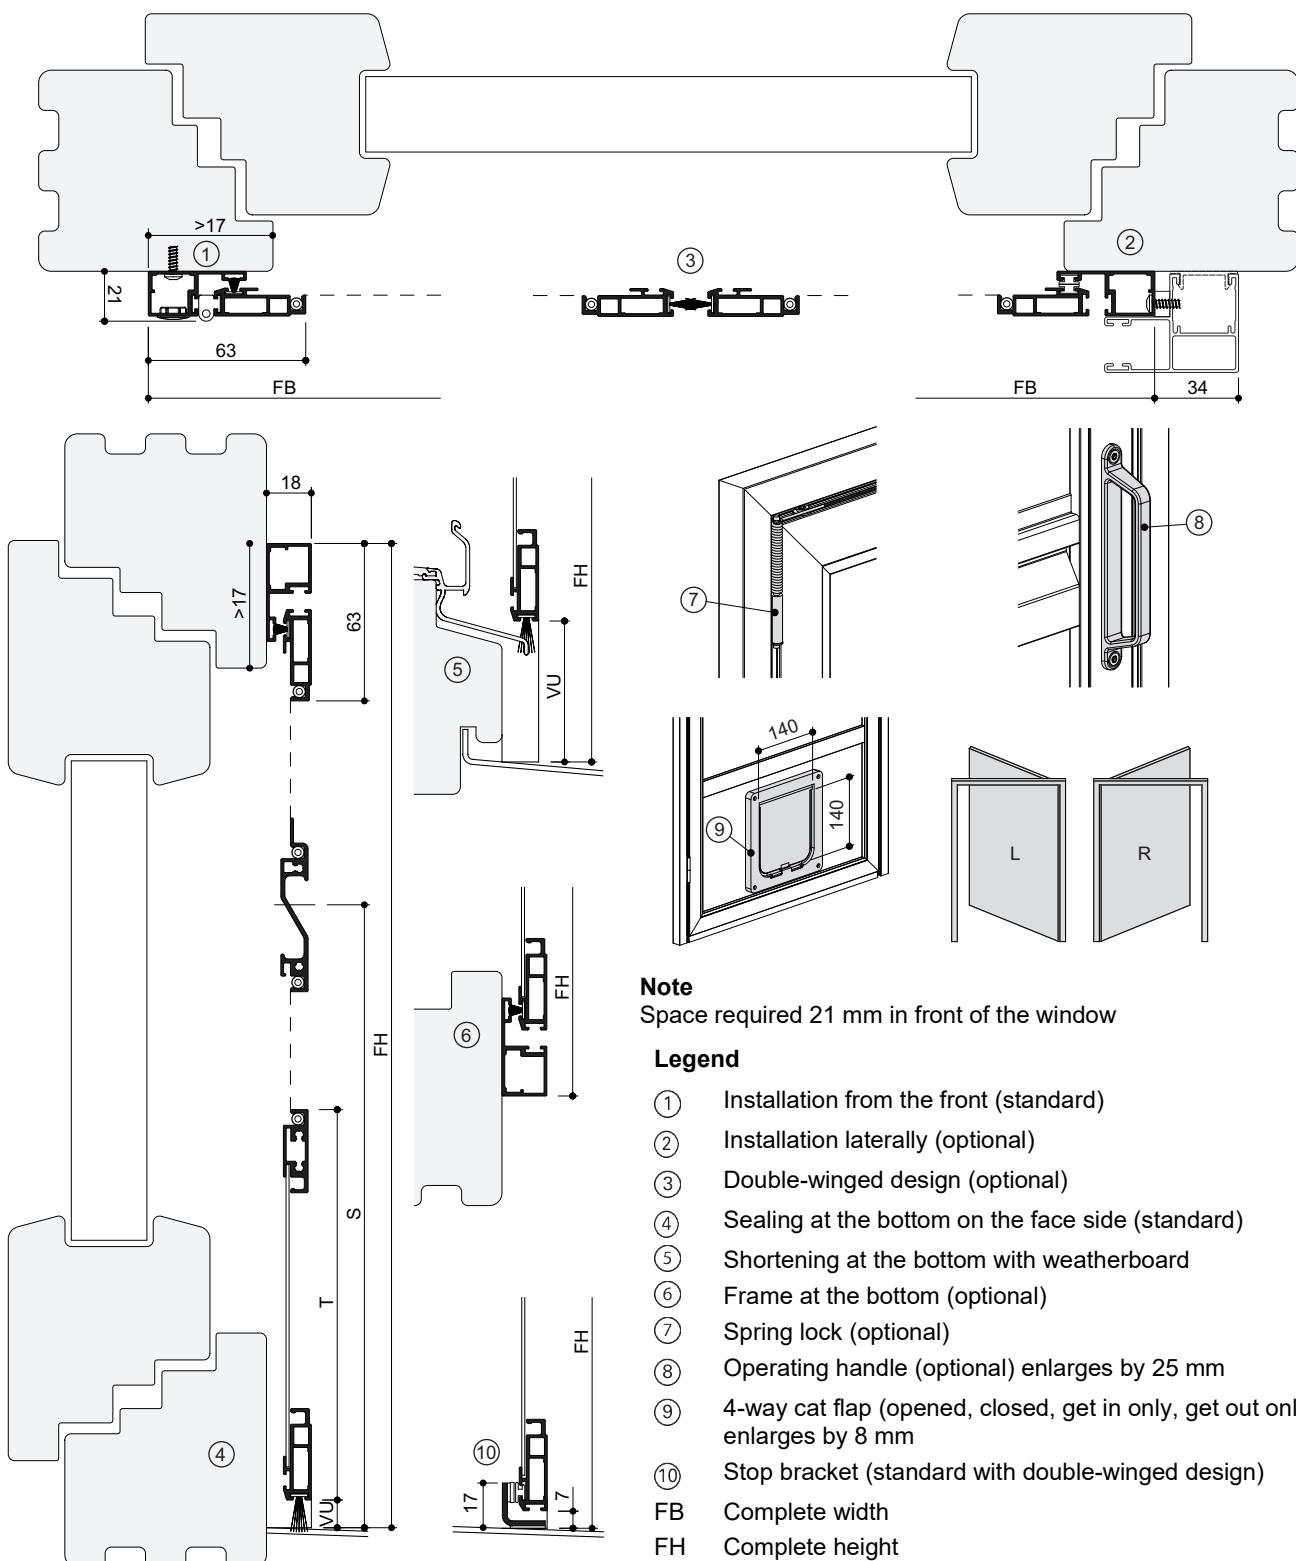

- | | |
|-----|---|
| (1) | Self-bonding magnetic tape (standard) or screwed stainless steel tape (optional) |
| (2) | Sealing towards the inside (standard) |
| (3) | Special brush at the bottom side or at the face side |
| (4) | Spring lock (optional) additionally enlarges the width by 3 mm and the height by 13 mm |
| (5) | Operating handle (optional) enlarges by 25 mm |
| (6) | 4-way cat flap (opened, closed, get in only, get out only) enlarges by 8 mm |
| FB | Complete width (incl. hinge) |
| FH | Complete height |
| VO | Shortening at the top (10 mm with 15 mm brush or 20 mm with 25 mm brush) |
| VU | Shortening at the bottom (10 mm with 15 mm brush or 20 mm with 25 mm brush) |
| S | Sash-bar position (standard centred up to a complete height of 1800 mm and 1050 mm from a complete height of 1801 mm) |
| T | Tread plate (optional) 156 mm, 301 mm with cat flap |
| L | Left-hand door |
| R | Right-hand door |

Profiles provided

- 06080117 Frame profile 36x11 mm
- 06090112 Sash-bar profile 69x11 mm
- 06080124 Sash-bar profile 33x10 mm

Determining the dimensions of the swing frame

Type: ISD Z - swing frame with frame

Note

Space required 21 mm in front of the window

Legend

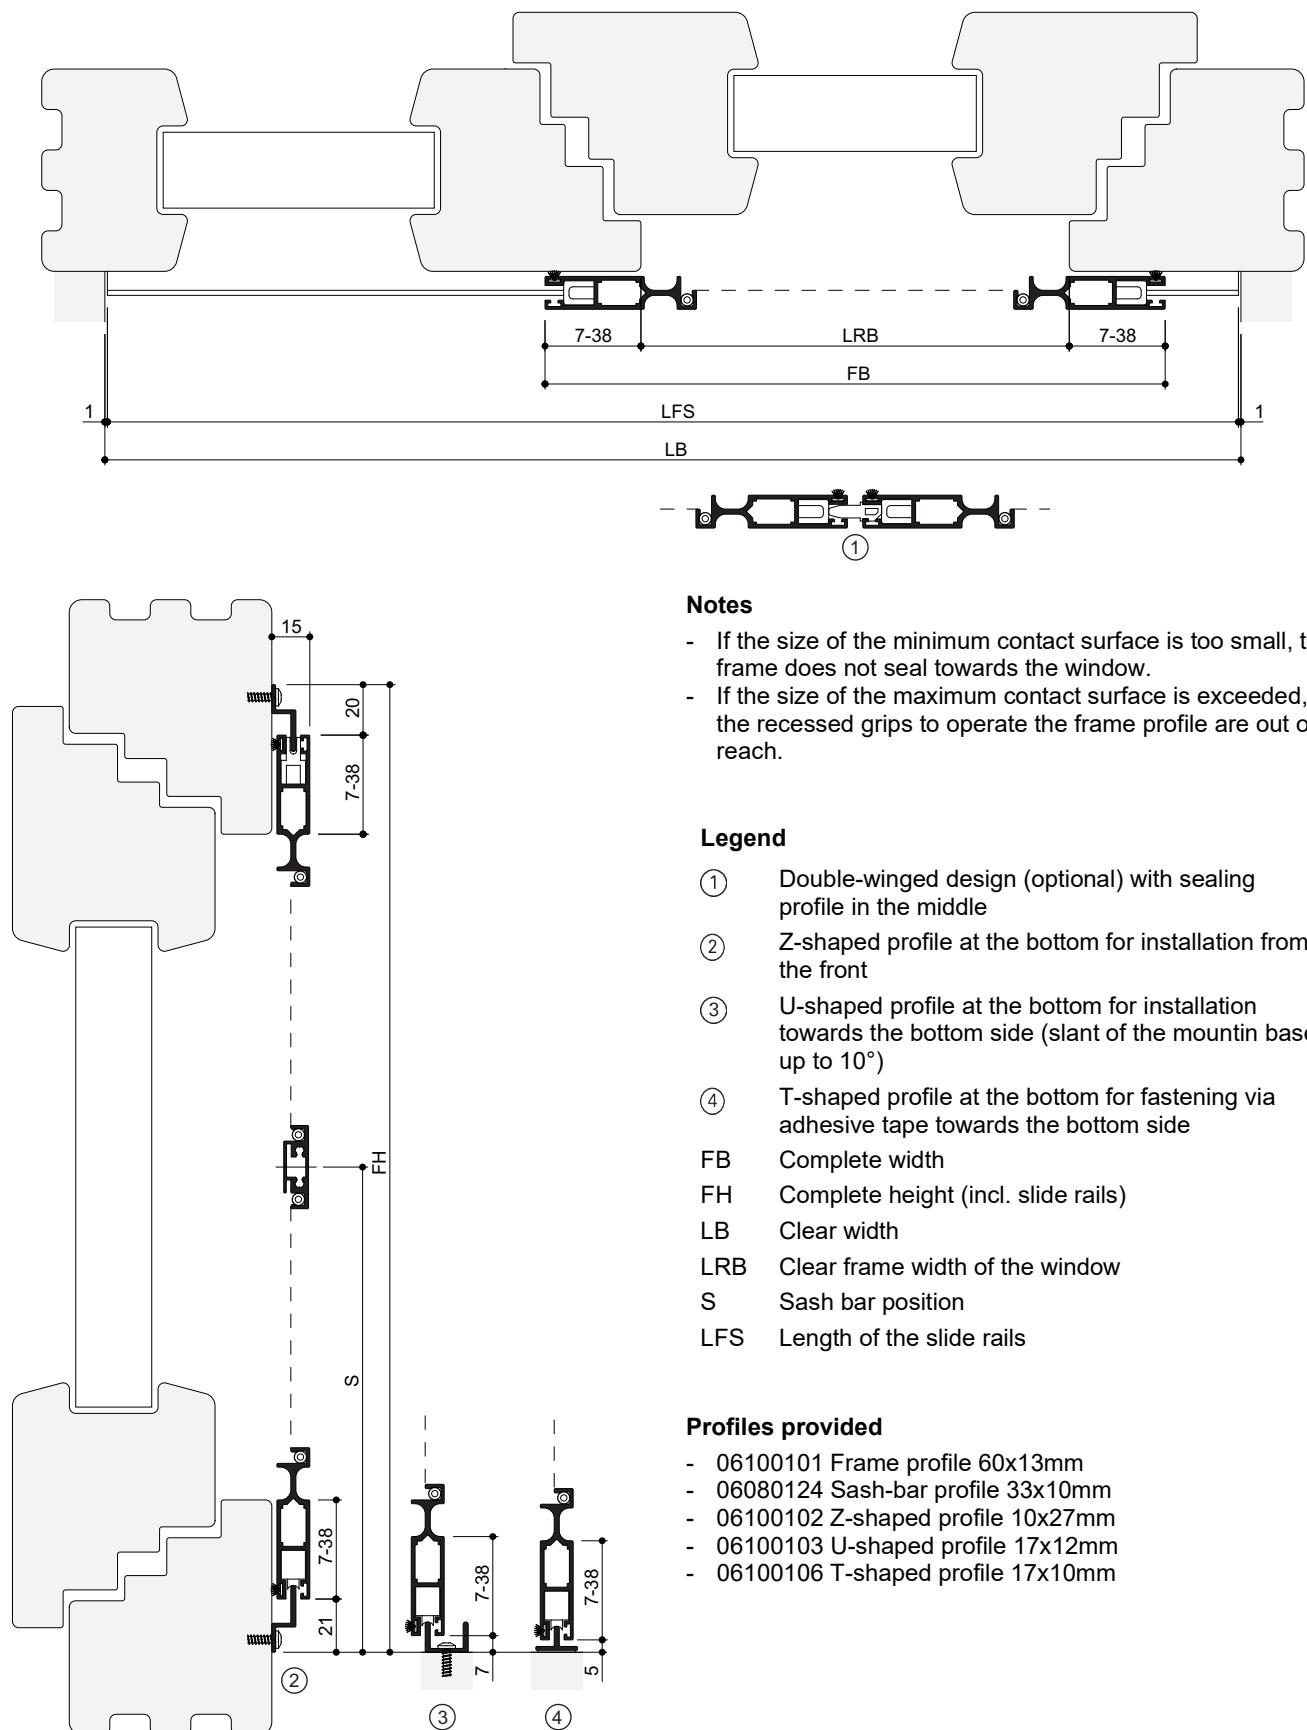

- (1) Installation from the front (standard)
- (2) Installation laterally (optional)
- (3) Double-winged design (optional)
- (4) Sealing at the bottom on the face side (standard)
- (5) Shortening at the bottom with weatherboard
- (6) Frame at the bottom (optional)
- (7) Spring lock (optional)
- (8) Operating handle (optional) enlarges by 25 mm
- (9) 4-way cat flap (opened, closed, get in only, get out only) enlarges by 8 mm
- (10) Stop bracket (standard with double-winged design)
- FB Complete width
- FH Complete height
- S Sash-bar position (standard centred up to a complete height of 1800 mm and 1050 mm from a complete height of 1801 mm)
- T Tread plate (optional) 156 mm, 301 mm with cat flap
- L Left-hand door
- R Right-hand door
- VU Shortening at the bottom (Standard 10 mm with 15 mm brush; 20 mm with 25 mm brush)

Profiles provided

- 06080117 Frame profile 36x11 mm
- 06090112 Sash-bar profile 69x11 mm
- 06080124 Sash-bar profile 33x10 mm
- 06090111 Frame profile 39x18 mm

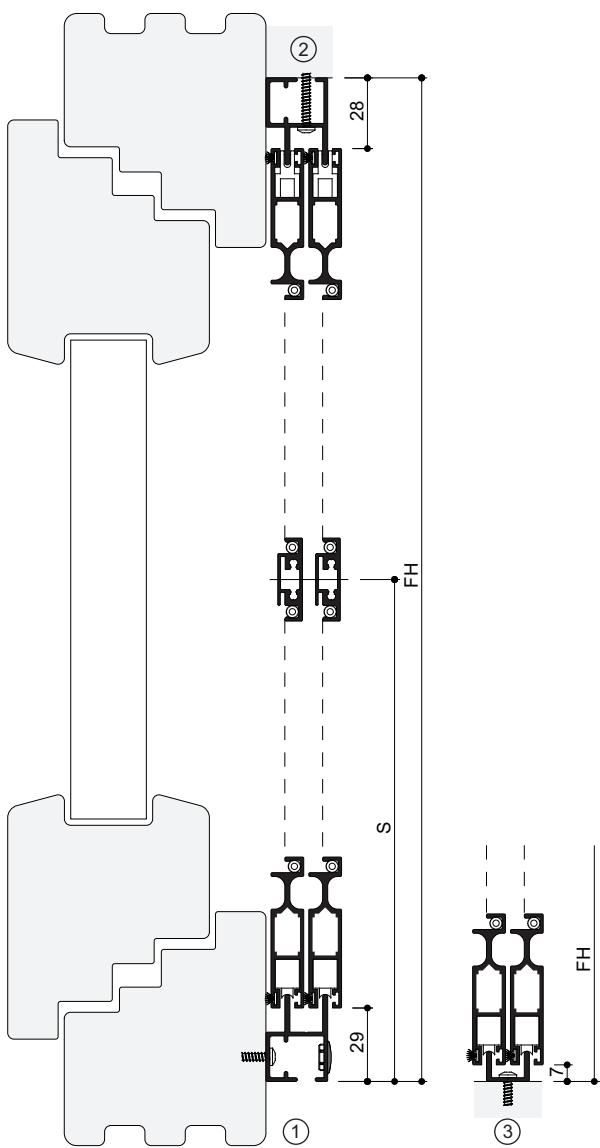

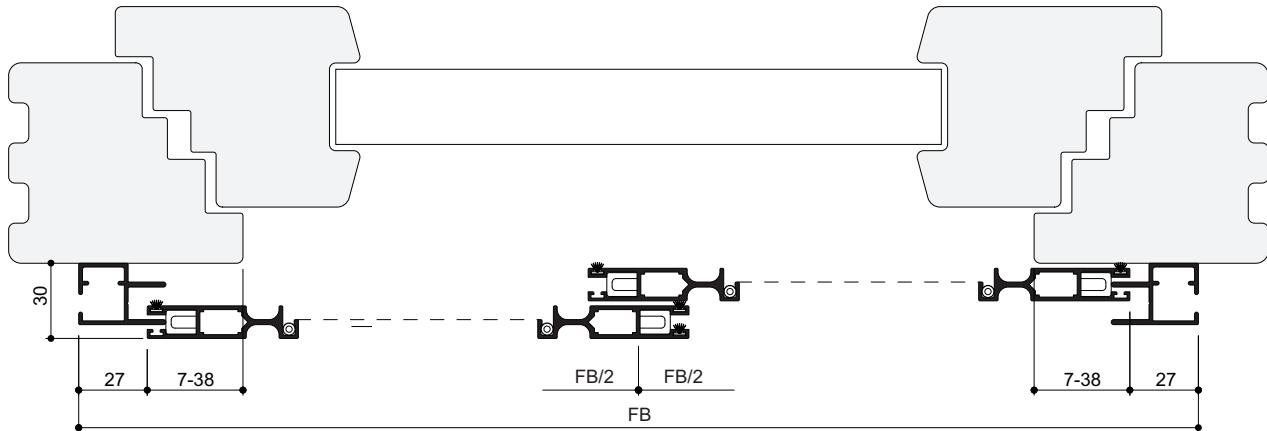

Determining the dimension of the slide frames

Type: IST E - slide frame simple

Determining the dimension of the slide frames

Type: IST Z - slide frame with frame

Notes

- If the size of the minimum contact surface is too small, the frame does not seal towards the window.
- If the size of the maximum lateral contact surface is exceeded, the recessed grips to operate the frame profile are out of reach.

Legend

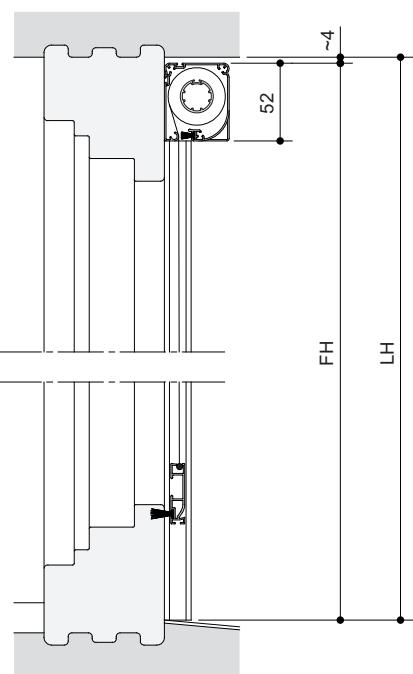

- ① Screwing of the frame profile from the front (standard)
- ② Screwing of the frame profile to the top/bottom in the soffit (optional)
- ③ U-shaped profile at the bottom for installation towards the bottom side
- FB Complete width
- FH Complete height
- S Sash bar position

Profiles provided

- 06100101 Frame profile 60x13 mm
- 06080124 Sash-bar profile 33x10 mm

Ordering information	
Complete width	FB = LB - 4
Complete height	FH = LH - 4
Sealing of the end rod	at the rear side (STD), at the bottom side, at the rear side and at the bottom side
Inset type handle	yes / no
Stop at the top	yes / no
Installation direction	frontal (STD) / laterally
Mounting base	Wood, plastic, brickwork, metal

Determining the dimensions of the pleated insect screen

Type: ISPL18 Pleated insect screen 18 mm

Notes

- The pleated insect screen is designed symmetrically to the operating level and can therefore be used for both opening directions.
- The side where to place the installation frame is changeable.
- To ensure that the recessed grips are accessible in each position, the complete width must be reduced accordingly.

Legend

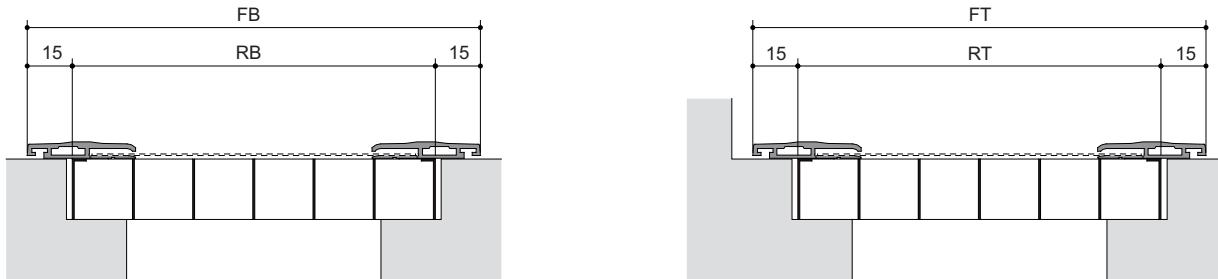

- (1) Installation from the front with installation frame screwed
- (2) Installation from the front with installation frame glued
- (3) Installation towards the outside without installation frame
- FB Complete width
- FH Complete height
- PTB Stack width
 - 92 mm with FB 500-1000 mm
 - 102 mm with FB 1001-1300 mm
 - 112 mm with FB 1301-1600 mm
 - 121 mm with FB 1601-1900 mm
 - 131 mm with FB 1901-2200 mm

Profiles provided

- 06210301 Wall profile 18x30 mm
- 06210201 Handle profile 18x48 mm
- 06210901 Slide rail at the top 18x35 mm
- 06210902 Slide rail at the bottom 18x7 mm
- 06210501 Installation profile at the top 15x10 mm
- 06210502 Installation frame 15x22 mm (optional)

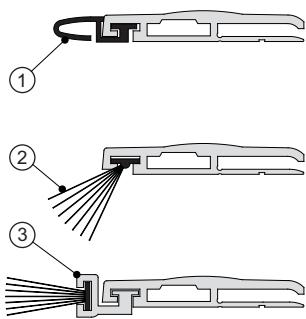

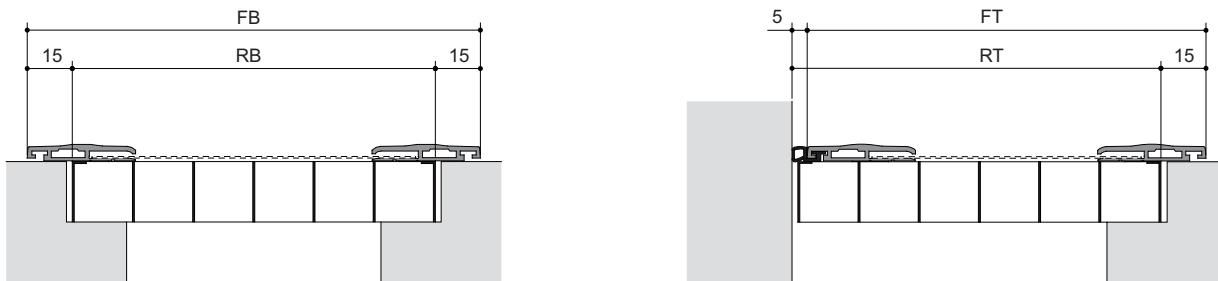

Determining the dimensions of the light shaft cover

Type: ILS 1 – Cover for light shafts with support surfaces on 4 sides

Ordering information	
Complete width	FB = RB + 30
Complete depth	FT = RT + 30

Type: ILS 2 – Cover for light shafts with support surfaces on 3 sides

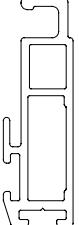

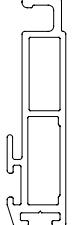

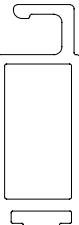

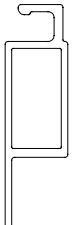

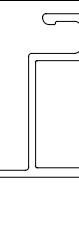

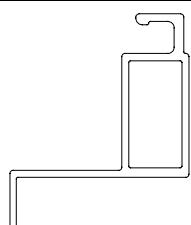

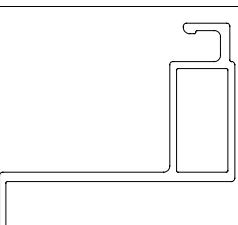

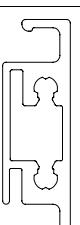

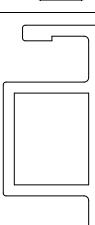

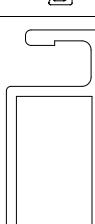

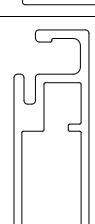

Legend

- | | |
|-----|---|
| FB | Complete width |
| FT | Complete depth |
| RB | Grating width |
| RT | Grating depth |
| (1) | Sealing lip: with normal plaster – unevenness up to 6mm |
| (2) | Sealing lip: with rough plaster – unevenness up to 9mm |
| (3) | Brush holding profile with 15mm sealing lip: for plain and rough surfaces |

Ordering information	
Complete width	FB = RB + 30
Complete depth	FT = RT + 10
Wall connection	Sealing lip / sealing brush

Assembly instructions

Type: Insect screen frame

Pre-fabrication of the profiles

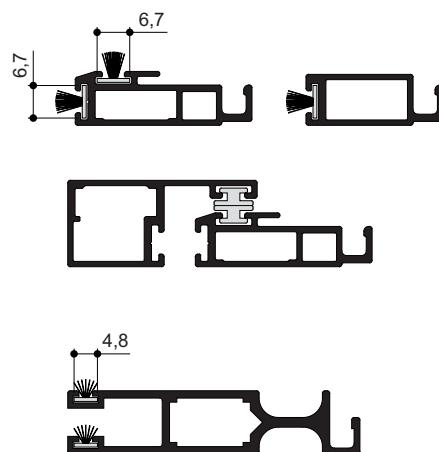

Work on the profile according to sketch and insert the **spring pins (1)**

Before the corner joint pressing, insert the **hinges ISD Z** into the frame profiles and **clip** them at the desired position. After the corner joint pressing, **screw** the **hinges ISD E** to the frame profile using drilling screws.

For **universal frame profiles** use the stepped drill bit 30010003 and the drilling device 30500005 for drilling and, after the corner joint pressing, **screw them to the sash bar**.

With all other frame profiles, the sash bar jointer is shortened at the predetermined breaking point, screwed to the profile and the sash bar is clipped on.

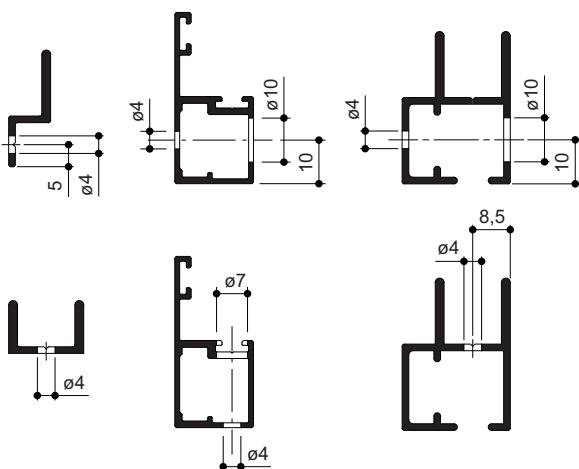

Pull in the**brushes and the magnetic profile** into the frame profiles and cut them to length so that they are flush with the profile. Even after the press-fitting of the frame profiles it is possible to push the brushes into the brush channel.

Assembly instructions

Type: Insect screen frame

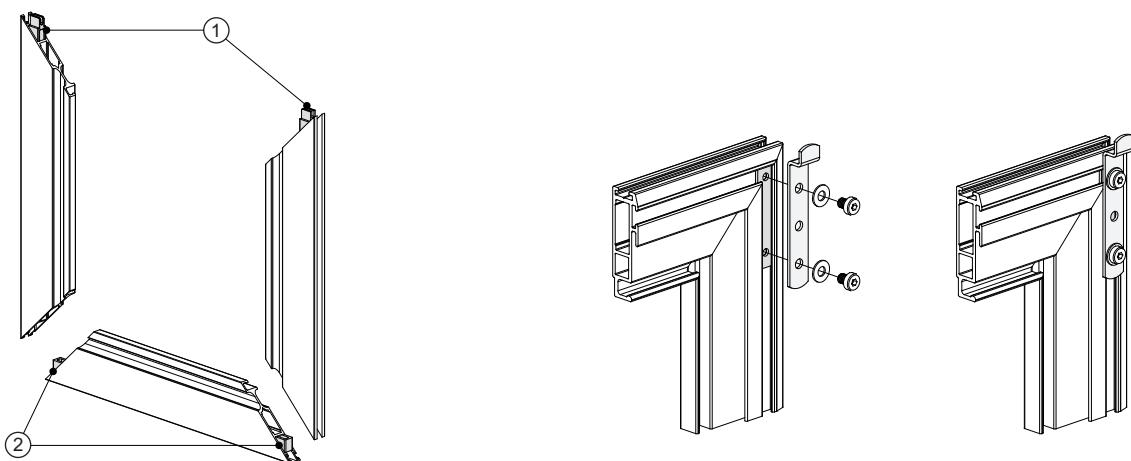

Pre-fabrication of the profiles

The **boreholes in the sliding rails / frame profiles** depend on the mounting direction

- Number of boreholes according to table
- The edge distance is 100mm on both sides, the other boreholes in between are equally arranged

Length	from [mm]		601	1101	1601	3001
	to [mm]	600	1100	1600	3000	5500
Number of boreholes	unit(s)/GR	2	3	4	5	6

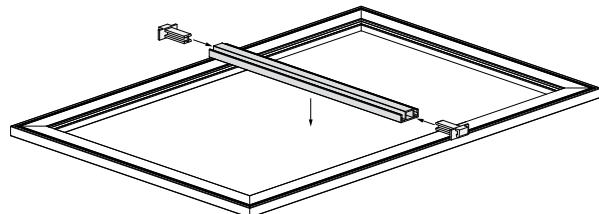

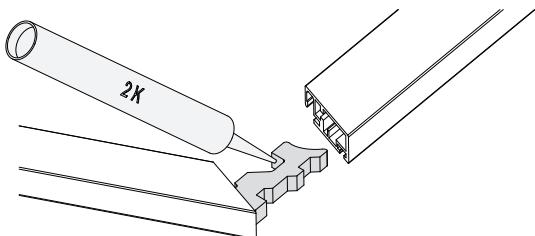

Insert the **guide rollers and lift-out protection devices (set of guide rollers)** into the frame profiles for the slide frame. After the press-fitting of the profiles clamp the guide roller profiles (2) in the outermost position and place the lift-off protection devices (1) at least 50mm beneath the topmost position.

Before the corner joint pressing, insert the slot nuts for the suspension brackets into the vertical frame profiles. Screw the **suspension brackets** after the corner joint pressing **to the slot nuts** and clamp them at the outermost position.

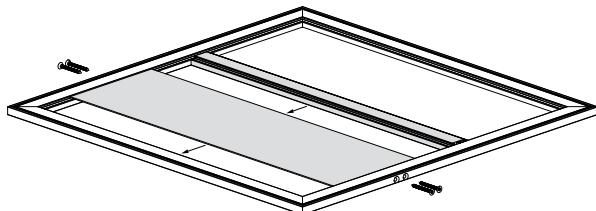

Assembly instructions

Type: Insect screen frame

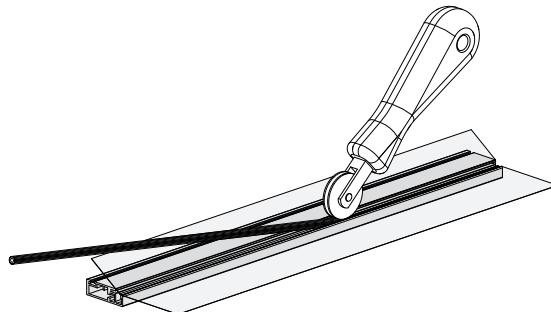

Assembling the frame

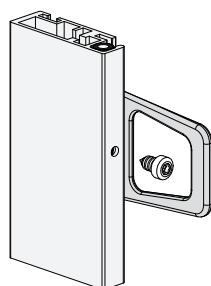

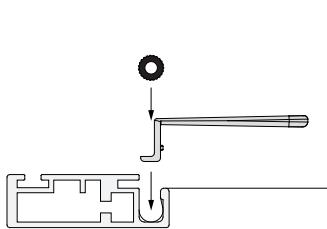

Stick the frame profiles and the **corner joint together** and **press-fit** them with the help of a corner joint press

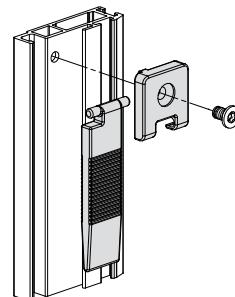

Assemble the **pluggable central sash-bar** and clip it into the keder channel

Insert the **kick plate** into the grooves of the frame profiles and fix it via the screwable central sash-bar.

Fix the fabric in the frame- and sash-bar profiles by **rolling in the keder** with a gasket roller; after that cut the overhanging fabric off.

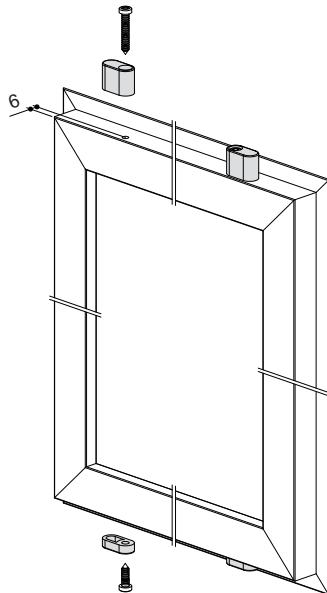

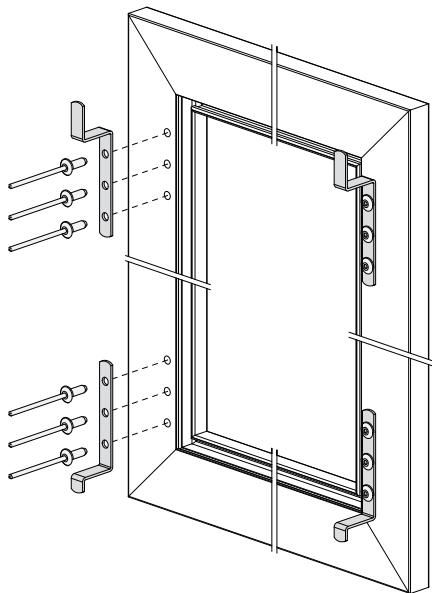

Roll in the **handle lugs** together with the fabric and fix them with a screw, if required.

Screw the **hinged handle** to the frame.

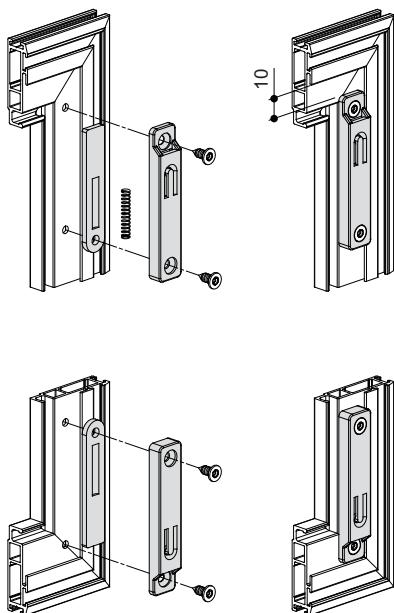

Assembly instructions

Type: Insect screen frame

Assembling the frame

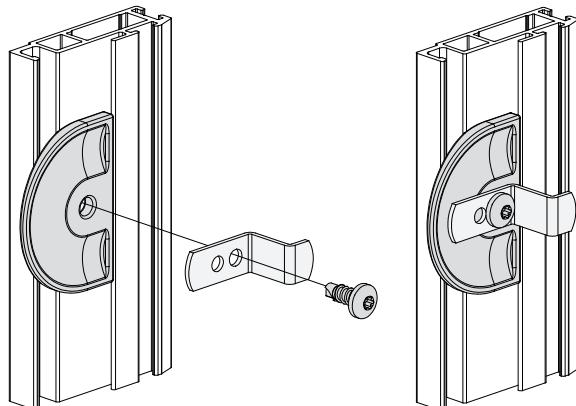

Drill the profiles with the help of a drilling jig (30500001/2) ($\varnothing 3.2$); then rivet the **suspension brackets**

Screw the **holding device for the suspension bracket** to the frame. To facilitate transport, the suspension brackets are inserted into the holding device on-site.

Position the **plastic stoppers** according to sketch and screw them to the frame

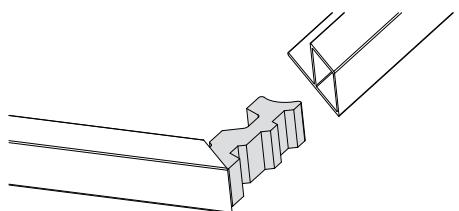

From a profile length exceeding 1500 mm, screw the **lateral locking device** centrally to the vertical frame profiles.

Assembly instructions

Type: Insect screen frame

Assembling the frame

Press the frame profile for the swing frame in the **corner joint**. The clampable corner joints make it possible to assemble the frame profiles for the slide frames on site. This facilitates the transport of large, multipart elements.

Assembly instructions

Type: IS13 - X quarter round / Q quadratic

Cutting dimensions

Component	Design	Cutting dimension
Vertical roller screen		
Cassette, shaft with screen, end rod with brushes	Guide rail 22 mm	FB - 18
Roller blind assembly set (KIT)	Guide rail 22 mm	FB - 18

Legend

FB Complete width

FH Complete height

Spring pretensioning

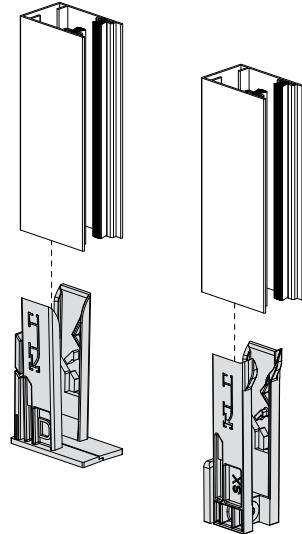

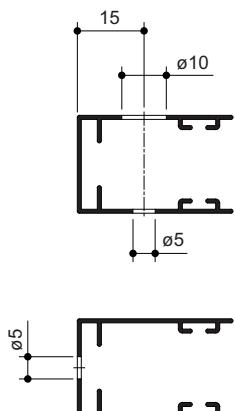

Attention - risk of injury!

Please refer to the table below for the rough estimation of the number of rotations (differences are possible).

Assembly instructions

Type: IS13 - X quarter round / Q quadratic

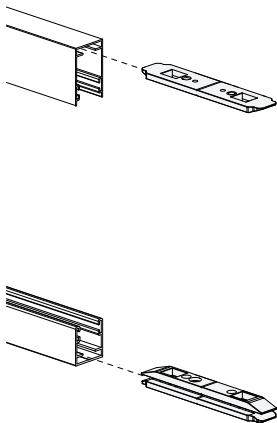

Prefabrication of guide rails

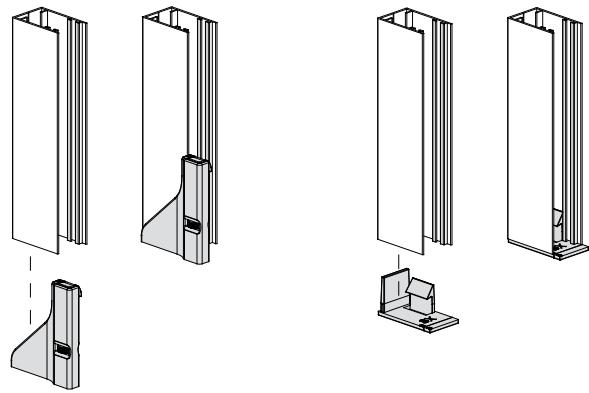

The **boreholes in the guide rails** depend on the mounting direction; number of boreholes according to the table below; the edge distance is 140mm on both sides, the other boreholes in between are equally arranged.

Length	from [mm]		1401	2501
	to [mm]	1400	2600	4000
Number of boreholes	unit(s)/GR	2	3	4

Insert the **locking device Easy-Click** so that it is flush with the bottom edge of the guide rail and tighten it slightly with the locking screw.

Insert the **locking device for the locking in the middle of the horizontal roller blind** on one side in the upper and lower guide rail and tighten it with a threaded pin.

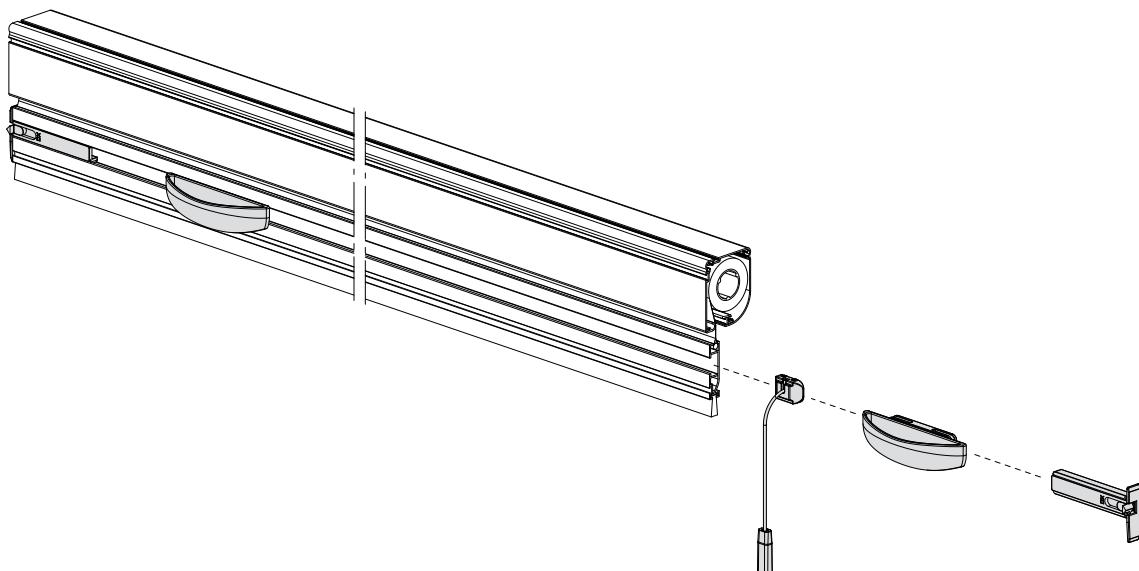

Place the **lock hook** onto the bottom edge of the guide rail.

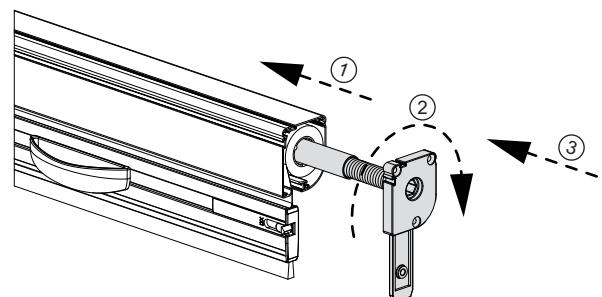

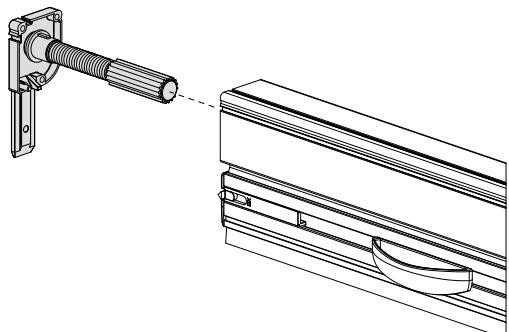

Assembly instructions

Type: IS13 - X quarter round / Q quadratic

Completion of the vertical roller blind

Insert the pull cord and the shell type handle into the end rod; insert another brush into the end rod, if necessary. Place the end caps on the end rod.

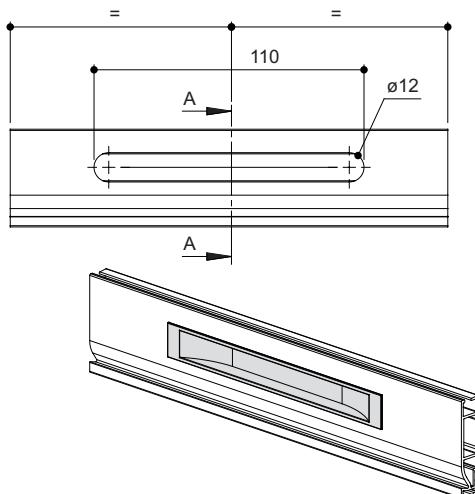

Push the end cap with the brake into the insect screen shaft and screw it to the cassette.

Insert the end cap with the spring shaft into the insect screen shaft (1), pretension the spring shaft by turning the end cap (2) and screw the end cap to the cassette (3).

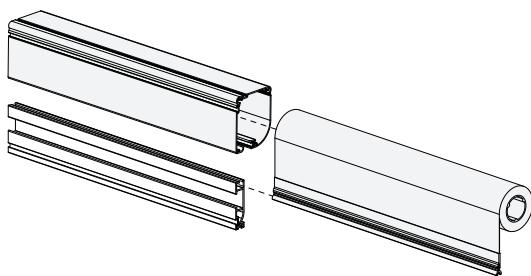

Assembly instructions

Type: IS13 - X quarter round / Q quadratic

Assembling the end rod, the insect screen fabric and the cassette

Mill the end rod according to sketch out and insert the **inset type handle** for the operation from both sides (optional) into the long hole

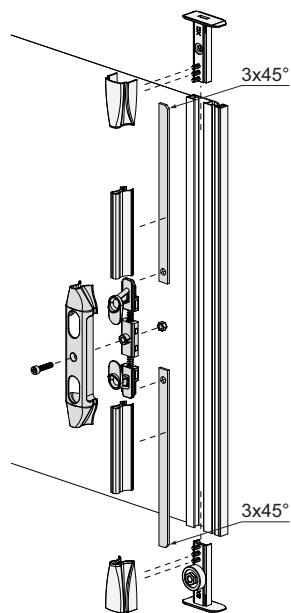

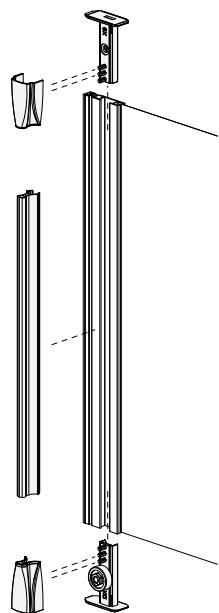

Insert the **insect screen fabric that is rolled-up upon the shaft** into the end rod and the cassette

Assembly instructions

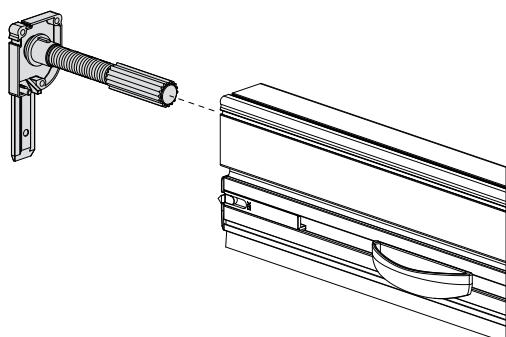

Type: IS13 - X quarter round / Q quadratic

Completion of the horizontal roller blind

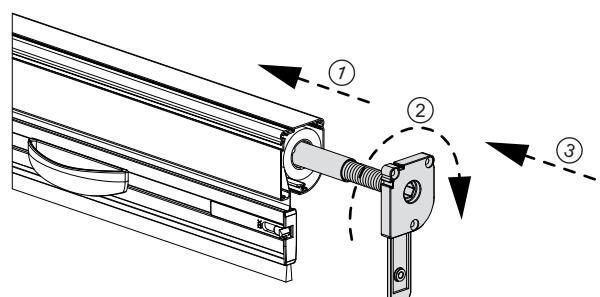

Clips the strengthening profile into the end rod, insert the end caps with the guide rollers into the end rod as shown in the illustration.

Provide the sash bolt with a chamfer of 3mm and push it together with parts of the locking set for the locking in the middle into the end rod. Clips the strengthening profile into the end rod and insert the end caps with the guide rollers into the end rod. Assemble the locking set for the locking in the middle according to sketch.

Push the end cap with the brake into the insect screen shaft and screw it to the cassette.

Insert the end cap with the spring shaft into the insect screen shaft (1), pretension the spring shaft by turning the end cap (2) and screw the end cap to the cassette (3).

Assembly instructions

Type: ISPL18 Pleated insect screen 18 mm

Assembly instructions

Type: ISPL18 Pleated insect screen 18 mm

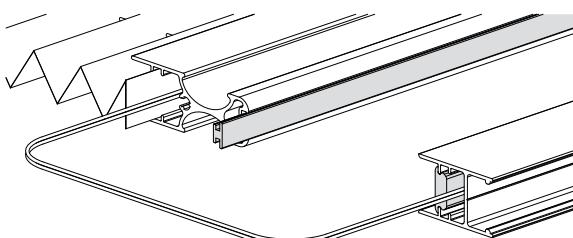

Completion of the pleats assembly set - KIT

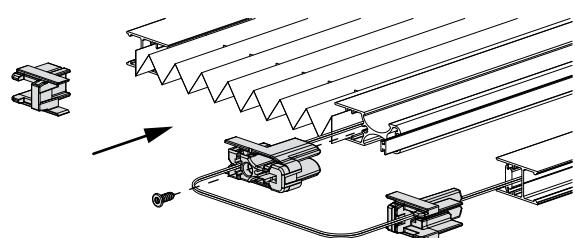

Push the handle profile and wall profile onto the grid package.

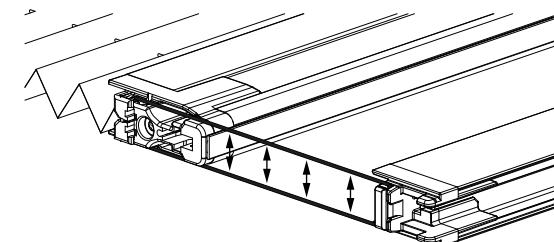

Push cord end pieces into opposite wall profile at top and bottom and clamp it.

Push magnet profiles into handle profile and wall profile.

Insert the upper end caps into the cords, put them onto the profiles and screw them together to the handle rail.

Laterally separate the lower cords via the end pieces so that they are not twisted.

Assembly instructions

Type: ISL Light shaft cover

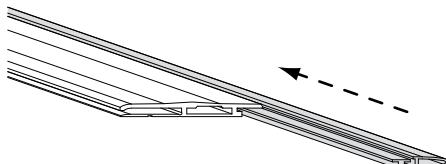

Cutting dimensions

Component	Design	Cutting dimension	Cutting type
Frame profile	Width	FB	(2)
	Depth	FT	(2)
Stainless steel fabric	all	(FB-43) x (FT-43)	
Adhesive tape	Width	FB-30	(2)
	Depth	FT-30	(2)
Sealing- / brush profile	all	Width	(2)

Legend

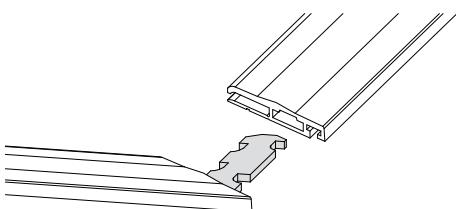

- FB Complete width
 FT Complete depth
 (2) Mitre cut 45° on both sides

Pre-fabrication of the profiles

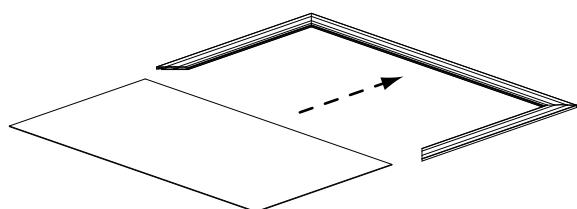

Insert the **sealing- or brush profile** into the frame profile, if required

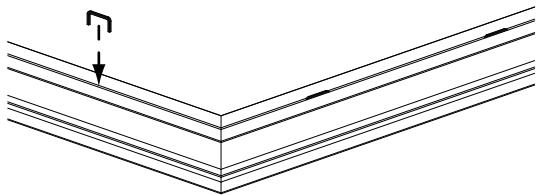

Assembling

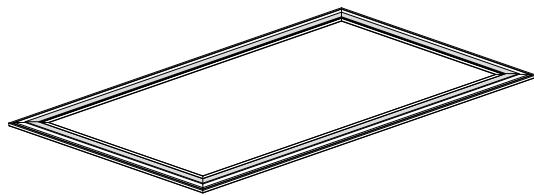

Stick the **frame profiles** and the **corner joint** on two edges together and press-fit them.

Push the **stainless steel fabric** into the frame and complete the frame by press-fitting of the fourth frame profile

Fix the stainless steel fabric with **retaining clips** in the frame profiles

Glue the **adhesive tape** on the bottom side of the frame

Explanation of the pictograms

General

The following symbols will assist you with the installation or use and require a safety-conscious conduct:

Attention!

This symbol indicates instructions that, if disregarded, can put the user in danger.

Attention!

This symbol indicates instructions that, if disregarded, can potentially result in damage to the product.

This symbol requires you to act.

Attention!

This symbol indicates a risk of injury or danger to life due to an electric shock.

This symbol indicates parts of the product, for which you will find important information in these installation instructions.

This symbol indicates the maintenance and repair of the product.

Safety instructions

These installation instructions refer to prefabricated elements, that (1) for 100% are made from parts, which are defined by us, and (2) which are made in manufacturing processes, which are defined by us too; in all other cases we do not provide any guarantee!

The safety instructions as well as the appropriate instructions must be read carefully before installation and use. In case of non-observance of the directions and information given in these instructions and in case of improper installation and operation or unintended use, the manufacturer shall not accept any warranty claims concerning any damage to the product. In these cases, the liability for consequential damage to any parts or persons is ruled out as well.

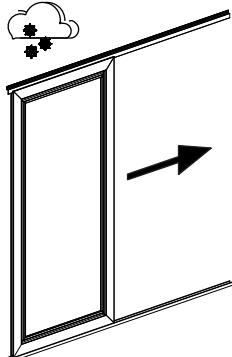

- Follow the described installation steps and pay attention to recommendations and notes.
- Keep these instructions in a safe place.
- All installation and removal works, as well as maintenance and repair works are only allowed to be carried out by authorised and qualified specialist staff.
- Observe the regulations for prevention of accidents of the employer's liability insurance association!
- Before operation check the unit for visible damage. If the unit is damaged, it should not be used; please consult authorized specialist staff immediately.
- Risk of injury and accident due to the weight of the product!
- To operate the unit only use the handles and handle rails provided to prevent injuries to persons and damage to the unit.

Danger of suffocation!

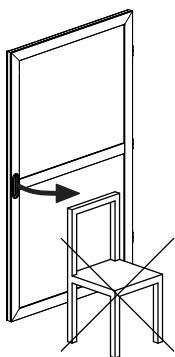

Ensure that the foil cannot get into the hands of children. Keep the foil in a safe place.

Safety instructions

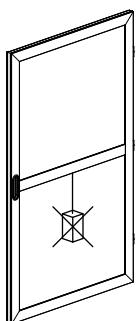

Operation in case of frost:

In case of frost externally mounted slide frames and swing frames may freeze shut. Avoid using force to operate the unit with snow or ice. In addition we recommend to unhinge the frames and store them in a dry room during the winter months.

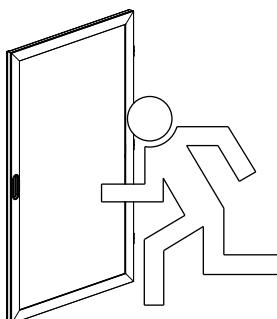

Danger of squashing with movable parts:

Swing frames and slide frames are only allowed to be operated with the handles and handle rails provided. When handling with these frames it must be ensured that no persons or obstacles are in their operating range.

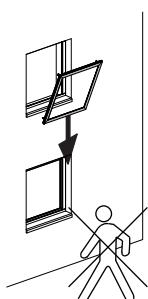

Using the product for the wrong purpose:

HELLA insect screen frames do not protect toddlers or pets from falling down. Do not lean against the swing frames, because these are not designed to carry additional loads – danger of fall hazards!

Overlooking due to its transparency:

Especially insect screen frames without sash bars run the risk of being overlooked. To prevent damage it is therefore recommended to make children or guests aware of these insect screen elements.

Danger that the clamping frames could drop down:

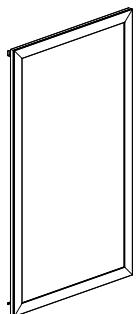

When hinging or unhinging the clamping frame it must be ensured that the hazard zone is safeguarded, if the clamping frame drops down.

Installation Instructions

You will find detailed and updated installation instructions for the individual HELLA products in the download area on our homepage: www.hella.info

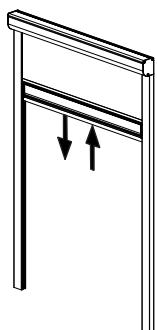

Operating guidelines

Insect screen for window

Clamping frame:

The installation as well as the removal of the clamping frames is described in the points "Installation" and "Removal".

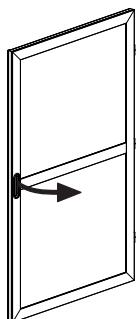

Roller blind:

Opening / closing of the insect roller screen by locking or unlocking the end rod of the insect roller screen at the lower limit stop.

Locking and unlocking the end rod Easy-Click by pushing the end rod downwards.

Operating guidelines

Insect screen for doors

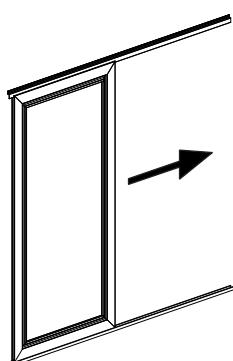

Swing frame:

Opening / closing the swing frame by pulling / pushing the handle bar, inset type handle or bow-type handle.

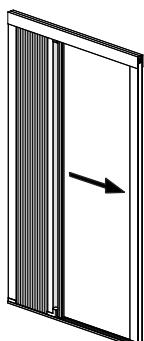

Handle the swing frame smoothly and slowly and do not let the screen shooting up or down to the closed or opened position, to avoid damage to the element and the surrounding area.
The maximum open position of swing frames is at a right angle (90°).

Slide frame:

Slide the frames by using the recessed grips that are provided on both sides in the frame profile. Handle the frame smoothly and with adequate effort. Handling the frame with too much verve may cause injuries or damage to the element.

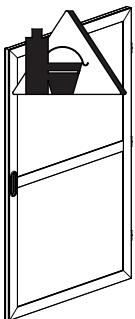

Pleated blind:

Opening / closing the pleated insect screen by moving the handle rail via recessed grips that are provided on both sides.

Due to the retention force of the holding magnet, increased effort is required to open the pleated insect screen, when it is closed completely.

Servicing, maintenance and repair

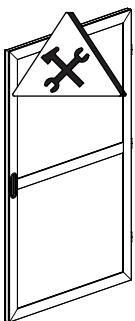

Cleaning:

Externally mounted units can get dirty in the course of time. This will not reduce the usability of your unit. The powder-coated parts will remain presentable for longer, if they are cleaned regularly with a soft woollen cloth.

Do not use solvents, alcohol (rubbing alcohol) or scouring cleansing agents! Dirt like fingerprints and light grease- or oil patches can be removed with the help of a mild household cleaner and a soft cloth. Rinse off with clear water and dry with a soft cloth.

Usually it is sufficient to clean the insect or pollen screen carefully with a vacuum cleaner. Please clean SOLTIS covers with a damp cloth. Regularly remove the remains of insects to avoid that birds pick holes into the insect screen cover (damage to the screen).

Remove regularly dirt or objects from the guide and slide rails.

Maintenance:

All inspection and maintenance works must be carried out by a specialised company from HELLA or a HELLA partner. Check the mechanical parts of your insect roller screen for visible damage. After unusual incidents, such as: maloperation and the like, the unit must be checked for noticeable damage prior to operating it. If the unit is damaged, it must not be used; consult authorized specialist staff immediately. It is recommended to have the unit maintained by specialist staff on an annual basis. This way wear is detected at an early stage and damage to the unit is prevented.

Repair:

Improper repair works may cause both risk of injury to persons or damage to the units. All repair works must be carried out by a specialised company from HELLA or a HELLA partner. Use original HELLA spare parts only.
